Commercial & Industrial
Energy Storage Solutions

May energy and ecology be more harmonious

ZHEJIANG YIYEN HOLDING GROUP

Zhejiang YIYEN HOLDING GROUP is a high-tech company that focuses on researching and manufacturing power electronic technology，integrating design, research and development, manufacturing, sales and service. YIYEN is dedicated to reducing electricity costs, improving electricity efficiency, and providing core power equipment and system solutions for the energy Internet of Things.With electrochemical energy storage and energy efficiency management as its core industry, YIYEN provides energy-saving service for power system, communication system, financial system, education system, medical system, and large industrial and mining enterprises.

Energy storage and energy efficiency management are critical reducing carbon emissions and promoting sustainable development. YIYEN's mission is to help make energy and ecology more harmonious by providing advanced energy storage and power quality solutions which improve efficiency, reduce costs, and promote clean energy.YIYEN will always continue to devote ourselves to the research and development and manufacturing of power electronic technology, and be committed to delivering cutting-edge solutions helping customers meet their energy management goals while contributing to a more sustainable future for all.

ATTESTATION OF CONFORMITY

DEKRA

Issued to: LISHUI YIYEN TECHNOLOGY CO.,LTD (Liping National Industrial Park) No. 77 Xiangfeng Road, Nanmingshan Street, Liandu District, Lishui City, Zhejiang Province, P.R. China

For the product: Energy Storage Battery

Trade name: YIY

Type/Model: LFP-M 48280H

Ratings: See model list

Manufactured by: LISHUI YIYEN TECHNOLOGY CO.,LTD (Liping National Industrial Park) No. 77 Xiangfeng Road, Nanmingshan Street, Liandu District, Lishui City, Zhejiang Province, P.R. China

Requirements: EN IEC 61000-6-2:2019 EN IEC 61000-6-4:2019

This Attestation is granted on account of an examination by DEKRA, the results of which are laid down in a confidential file no. 6198330.SH

This Attestation implies that the examined types are in accordance with the standards designated under the Electromagnetic compatibility directive (2014/30/EU).

The examination has been carried out on one single specimen or several specimens of the product, submitted by the manufacturer. This Attestation does not include an assessment of the manufacturer's production. Conformity of his production with the specimen tested by DEKRA is not the responsibility of DEKRA.

The CE marking may be affixed on the product if all relevant and effective EC directives are complied with.

Arnhem, 24 April 2024 Number: 6198330.01AOC

Grid-Side Energy Storage System

* Grid-connection * Islanding protection only * No PV

• Overview

Grid-Side Energy Storage System features bidirectional charging and discharging capabilities, enabling efficient energy release during peak demand periods (such as midday and evening peaks) and energy storage during off-peak times (like late night or early morning). This peak shaving and load leveling mechanism not only enhances grid stability but also reduces users' electricity costs. The system supports intelligent dispatch, allowing real-time response to grid commands and participation in energy market transactions, ensuring timely power delivery during peak demand and enhancing grid flexibility and reliability. With a discharge rate of up to 1C, the system can release its full rated capacity within one hour, maximizing revenue from energy trading. Additionally, the system supports AC coupling with renewable energy sources (such as solar and wind), effectively integrating distributed energy resources and improving overall system efficiency. Intelligent algorithms optimize charging and discharging strategies to adapt to different electricity prices and market demands, making the system suitable for various scenarios, including residential, commercial, and industrial applications, while supporting more efficient energy management and sustainable development goals.

On/Off-Grid PV Energy Storage System

* Grid-connected PV+energy storage * Islanding protection only * Backflow prevention

• Overview

On/Off-Grid Integrated Solar and Storage System integrates photovoltaic generation with energy storage, building on the functions of the grid-side energy storage system while adding an off-grid mode to ensure reliable backup power during grid outages. The system can seamlessly integrate with multiple energy sources (such as wind and diesel generators), achieving multi-energy complementarity and enhancing system flexibility and reliability. Through an intelligent Energy Management System (EMS), the system can monitor and optimize energy utilization in real-time, intelligently dispatching the charging and discharging strategies of the energy storage units based on power demand and renewable energy generation. The system also features high reliability and weather resistance, capable of operating efficiently in various environmental conditions (such as extreme temperatures, humidity, and wind speeds). This flexibility makes it highly suitable for diverse applications, including remote areas, emergency backup, and renewable energy integration.

Microgrid Energy Storage System

* On&off-grid * Off-grid independent Operation (ATS)

• Overview

A microgrid typically comprises a photovoltaic (PV) system (or wind power and other renewable energy generation devices), an energy storage system (such as lithium or lead-acid batteries), an Energy Management System (EMS), load management equipment, and necessary distribution infrastructure. A diesel generator can also be included as an auxiliary power source to ensure electricity supply during extreme weather or emergencies. The microgrid operates by having the EMS monitor real-time generation and load demand, intelligently dispatching power distribution. If generation exceeds demand, the excess electricity is stored in the energy storage system for later use; conversely, when generation is insufficient, the energy storage system releases power to meet demand. This flexible dispatch capability enables the microgrid to efficiently utilize renewable energy, reducing reliance on traditional fossil fuels. Microgrids are commonly used in remote areas, islands, campuses, hospitals, and industrial parks, where traditional grid infrastructure is costly or unreliable. Microgrids provide a flexible and reliable solution, enhancing energy security, reducing operational costs, and promoting sustainable development through self-sufficient power supply.

Micro-grid

PV-ESS All-in-One Unit

* Integrated energy storage equipment * Flexible * Off-grid independent Operation (STS)

• Overview

The PV-ESS All-in-One Unit combines a Power Conversion System (PCS), Maximum Power Point Tracker (MPPT), energy storage batteries, isolation transformers, and a Static Transfer Switch (STS). The MPPT technology within the system optimizes the solar energy harvested by the PV panels, ensuring maximum energy extraction under varying sunlight conditions and thus enhancing overall generation efficiency. The converted direct current (DC) is transformed into alternating current (AC) through the PCS. During periods of high electricity demand, the system can perform peak shaving and load leveling, balancing power supply and demand, and even responding to grid commands to participate in grid regulation. This flexibility allows the integrated solar storage unit to efficiently utilize renewable energy while playing a crucial role in the energy market. In the event of a grid failure, the system can quickly detect and switch to backup power mode, using the energy storage batteries to provide stable power output, ensuring the normal operation of critical equipment. This millisecond-level response capability offers users reliable power security, particularly in critical applications where power outages could lead to significant losses. Through its integrated design, the unit not only enhances energy utilization efficiency but also improves system safety and reliability.

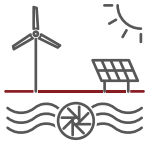
GENERATION-SIDE END

• Overview

Energy storage plants play an important role on the generation side by providing a buffer between electricity generation and consumption. They allow excess energy to be stored when demand is low and released when demand is high, which can help improve the efficiency and reliability of power generation.It can also help mitigate the impact of intermittent renewable energy sources such as wind and solar. By storing excess energy generated during periods of high production, energy storage power plants can help ensure a consistent supply of electricity when these sources are not producing.

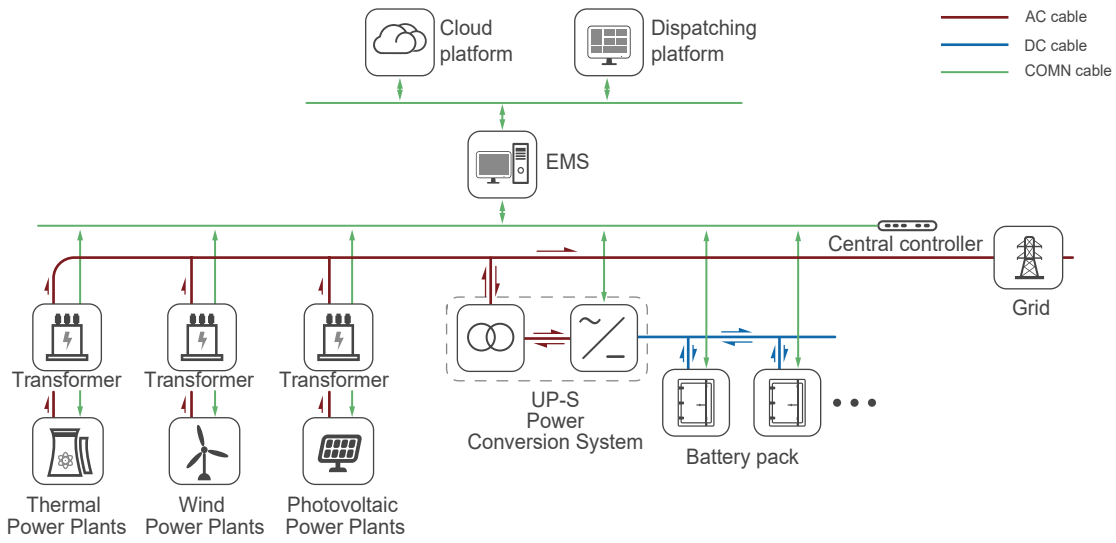
Load shifting



Renewable
energy integration

Capacity stability

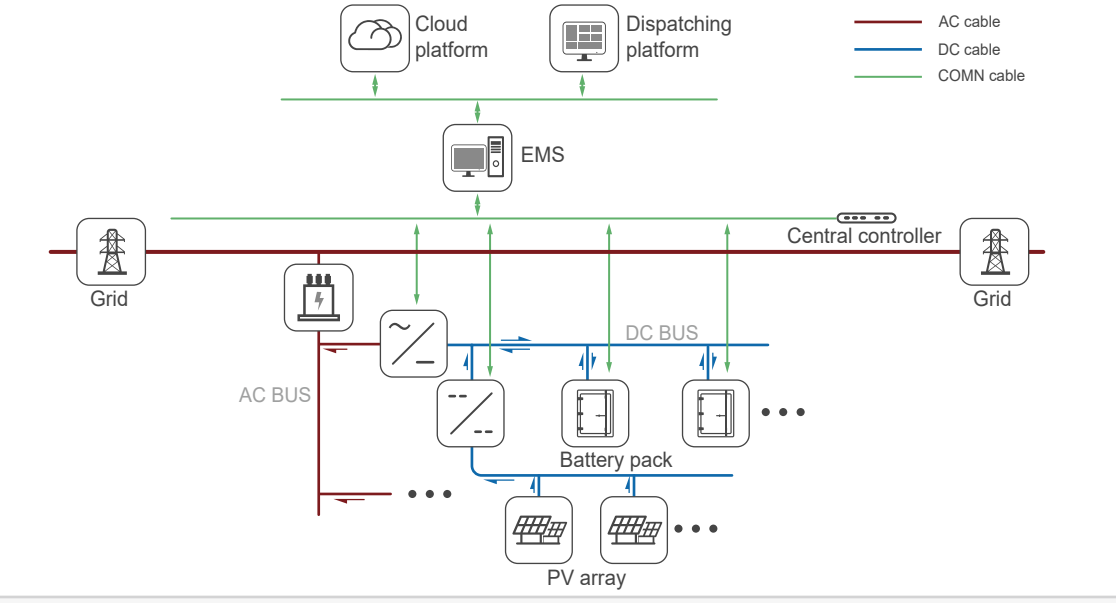
• Generation-Side Energy Storage



Applications:

- Frequency regulation
- Smoothing renewable energy fluctuations
- Improving power quality
- Enhancing grid frequency response speed
- Boosting power system scalability

• Integrated PV Energy Storage Station



Applications:

- Smoothing fluctuations in renewable energy
- Increasing energy utilization efficiency
- Enhancing response capability to grid frequency regulation
- Improving the stability of the power system

TRANSMISSION & DISTRIBUTION END

• Overview

A grid-scale energy storage plant plays a crucial role in improving the reliability and stability of the electricity grid. These power plants store excess energy during periods of low demand and release it during periods of high demand, helping to balance supply and demand on the grid. This can help reduce the need for expensive and less efficient peaking power plants, which are typically used only during periods of high demand.

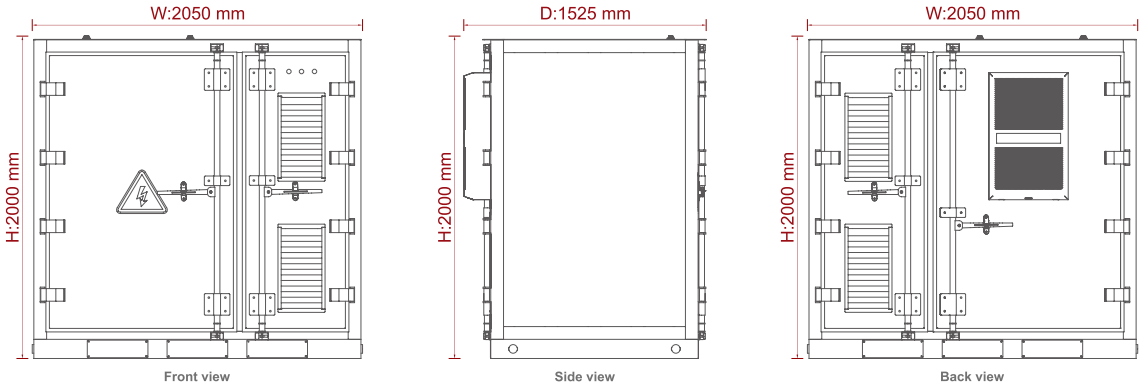
Hybrid Commercial and Industrial ESS

BESS 60-120(-60) / 60-160(-60)

• Features

- All-in-one design with a high degree of integration.
- Modular design with optional modules of different sizes.
- Support for grid-connected and off-grid operation.
- MPPT Solar controller available as an option.
- IP54 class fire and explosion-proof housing.
- Patented air duct design, intelligent air cooling, 3-5°C temperature difference of the battery cell.

• Product Dimensions



• Technical Parameter

BESS Series Hybrid Commercial and Industrial ESS		
Model	60-120(-60)	60-160(-60)
AC specificaiton		
AC rated power	60kW	
PCS rated current	140A	120A
PCS Port voltage	250VAC	290VAC
AC rated voltage	400V ± 15%	
Rated frequency	50Hz ± 2.5Hz	
AC rated current	87A	
AC overload capacity	x1.1 (10min) ; x1.2 (60S)	
Grid structure	3-phase 4-wire+PE	
Output THDi	≤3%	
AC PF	-1~1	
Battery system		
DC rated voltage	460V	563V
DC voltage range	403V~518V	493V~633V
Rated capacity	280Ah	
Rated energy	129KWh	157.7KWh
Max discharge current	140A	120A
Cell	3.2Vdc 280Ah LiFePO4	
Battery module	51.2Vdc 280Ah 14.33KWh Air cooling	
MPPT(Optional)		
PV DC.Max Voltage	520V	630V
MPPT Voltage Range	350~520V	350~630V
Number of MPPT paths	1	
Number of branch inputs	20	
Max. branch current	15A	
Voltage range	403V~525V	493V~642V
Rated current	140A	
Max. output current	80A	
Max. efficiency	>98%	
Transformer specification		
Specification	60KVA three-phase isolation/vertical	
Overload capacity	x1.1	
Insulation class	CLASS H 180℃	
Transformation ratio	250V : 400V	290V : 400V
Design temperature	Temperature rise≤90K	
Protection Level	IP54	
General Data		
Cooling	Air conditioning cooling + intelligent air cooling	
Noise Level	≤75dB	
Temperature Range	-20℃ ~ 50℃ (> 45℃ capacity reduction)	
Protection Level	IP54	
Highest altitude	3000m (> 2000m capacity reduction)	
Humidity Range	0~95%(No condensing)	
Size (W*D*H)	2050*1525*2000 mm	
Weight	2490kg (Includes MPPT module)	2860kg (Includes MPPT module)
Installation mode	Vertical mounting	
Maximum efficiency	95.5%	
Isolation mode	Built-in isolation transformer	
Protection function	Ac over/under voltage, over temperature, abnormal frequency, AC phase error, over current, communication failure, fan failure, insulation impedance detection, anti-island	
Display	Touch screen	
Communication interface	RS485 / CAN / LAN	
Certification	CE-EMC(EN 61000-6-2/-4) ; CE-LVD(IEC 62109-1/-2) ; UN38.3	

BESS

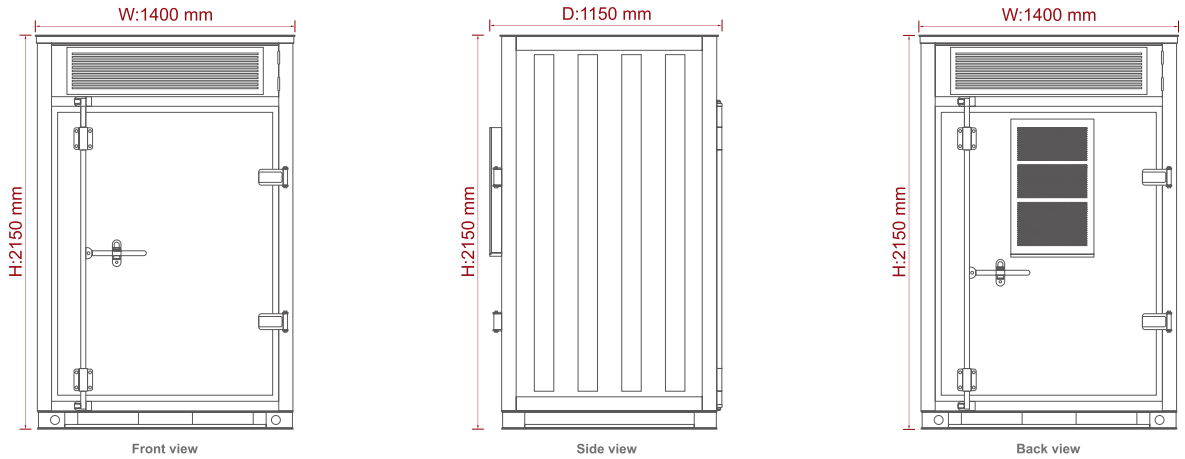
Hybrid Commercial and Industrial ESS

BESS 60-80

• Features

- All-in-one design with a high degree of integration.
- Modular design with optional modules of different sizes.
- Support for grid-connected and off-grid operation.
- IP54 class fire and explosion-proof housing.
- Patented air duct design, intelligent air cooling, 3-5°C temperature difference of the battery core.

• Product Dimensions



• Technical Parameter

BESS Series Hybrid Commercial and Industrial ESS	
Model	BESS 60-80
AC specificaiton	
AC rated power	60kW
PCS rated current	140A
AC rated voltage	400V±15%
Rated frequency	50Hz/±2.5Hz
AC rated current	87A
AC overload capacity	x1.1 (10min) ; x1.2 (60S)
Grid structure	3-phase 4-wire+PE
Output THDi	≤3%
AC PF	-1~1
Battery system	
DC voltage range	672~864V
Rated capacity	105Ah
Rated energy	80KWh
Max discharge current	140A
Cell	3.2Vdc 105Ah LiFePO4
Battery module	51.2Vdc 105Ah 5.37KWh Air cooling
General Data	
Cooling	Air conditioning cooling+intelligent air cooling
Noise Level	≤75dB
Temperature Range	-20°C ~ 50°C (> 45°C capacity reduction)
Protection Level	IP54
Highest altitude	3000m (> 2000m capacity reduction)
Humidity Range	0~95%(No condensing)
Size (W*D*H)	1400*1150*2150 mm
Weight	/
Installation mode	Vertical mounting
Maximum efficiency	97.5%
Protection function	AC over/under voltage, over temperature, abnormal frequency, AC phase error, over current, communication failure, fan failure, insulation impedance detection
Display	Touch screen
Communication interface	RS485 / CAN / LAN
Certification	CE-EMC(EN 61000-6-2/-4) ; CE-LVD(IEC 62477-1;IEC 62040-1) ; IEC 62619 ; UN38.3

Energon

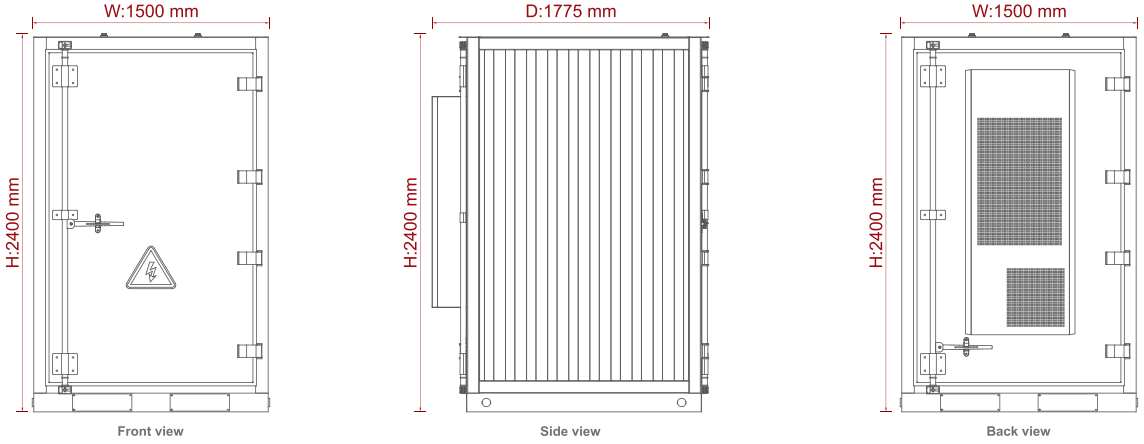
CE IEC UN38.3

Outdoor Energy Storage Battery Cabinet

• Features

- Multi level BMS built-in.
- IP54 fire and explosion proof cabinet.
- Scalable in power and capacity.
- Easy for on site installation.
- Fire proof devices in each modular and in the cabinet.

• Product Dimensions



• Technical Parameter

Energon Series Outdoor Energy Storage Battery Cabinet	
Battery parameter	
Cell	3.2V 280AH
Battery type	LFP(LiFePO4)
Battery module	51.2V 280AH
Battery module Qty.	15
Battery cluster	768V 280AH
Battery cluster configuration	1P16S*15
Electrical parameter	
Nominal energy	215Kwh
Nominal voltage	768Vdc
System voltage range	672-852VDC
System charge/discharge rate	0.6C
Depth of charge and discharge	100%—10%
No. of cycles	6000
Balanced compensation power	1500W（25A）
Compensation methods	Dynamic real-time compensation
Recommended AC side power	125KW
Protection	
DC input/output	Disconnect switches+fuses
Electrical isolation	Inter - module controlled protection breakout
Fire protection systems	Two-stage aerosol fire module + Smoke sensors + Enclosure explosion - proof pressure relief device
General Data	
Communication	RS485/CAN/LAN/4G
Communication protocols	ModBusTCP/CAN
Working temperature range	-20 ～ 50℃ charge/0 ～ 50℃ Discharge
Relative humidity	0 ～ 95%(No condensing)
Cooling	Air cooling(air conditioner+fan)
Noise	≤65db
Highest altitude	≤2000m
Degree of protection	IP54
Dimension(W*D*H)	1500*1775*2400mm
Weight	3.2T
Installation method	Cabinet floor mounting
Certification	CE-EMC(EN 61000-6-2/-4) ; CE-LVD(IEC 62477-1) ; IEC 62619 ; UN38.3

UP-S

Three Phase Power Conversion System

• Features

- Maximum efficiency can reach 97.5%.
- Modular design ,easy for installation and depolymen.
- Bidirectional power conversion system with full fourquadrant operation.
- 100kW to 500kW by 1 to 5 power modules.
- Multi-string technology for better battery safety and performance.
- Multiple battery strings working in parallel or independently to allow easy power and energy expansion.
- Grid-support function built-in.
- Optional STS/ATS to achieve switching between on-grid and off-grid.

UPV-S

Three Phase Solar+Storage Hybrid Inverters

• Features

- High stability, modular design support N+1.
- Bi-directional Power Conversion System.
- Built-in transformer.
- Support self-generation, micro-grid application.
- Supports on/off grid.
- Photovoltaic can be connected to a maximum of twice the capacity of the device.
- Dual-stage topology, wide battery voltage input range.
- With MPPT function to enhance system power generation.
- Self-contained solar storage operation strategy.
- Support communciation with BMS, EMS system.

UP-M

Power Conversion Module

• Features

- DSP+CPLD fully digital control core, modular design, easy to maintain and expand.
- Pure sine wave output, low current harmonic content, no pollution and no impact on the grid.
- Dual AC and DC power supply to meet the requirements of black start mode.
- Can be equipped with RS232/RS485, Ethernet and other communication interfaces to achieve remote data acquisition and monitoring.
- Supports EMS local controller for intelligent energy control.
- Bi-directional Power Conversion System.
- Compatible with 19-inch rack for easy integration and installation.
- Optional smart transfer switch for auto-backup.
- Optional STS to achieve seamless switching between on-grid and off-grid.
- Maximum efficiency can reach 97.3%.

LFP-R 14.33KWH

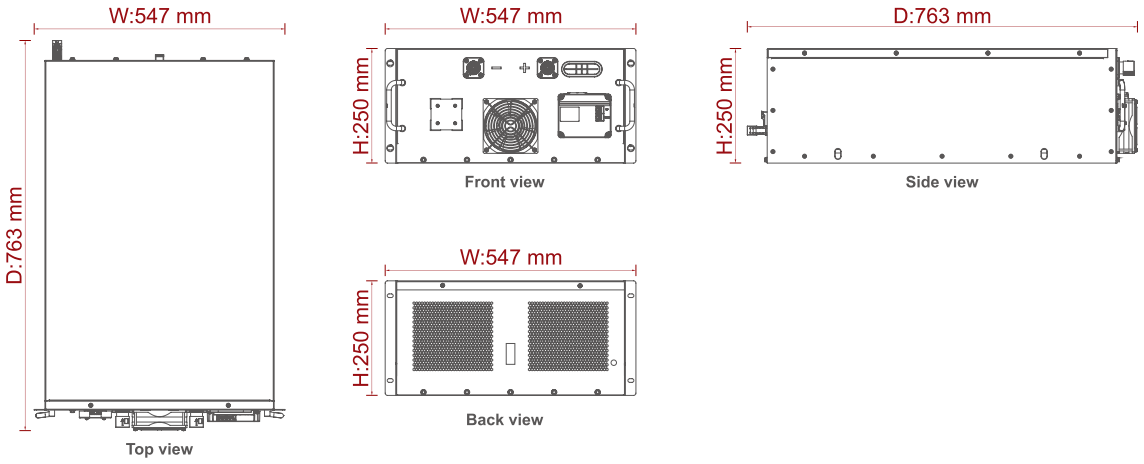
CE IEC UN38.3

LiFePO4 Battery Module

• Features

- 16PCS 280AH LiFePO4 cells.
- 51.2Vdc 14.33KWH rated capacity.
- Long cycle life 6000 times.
- Unique automatic calibration active banlancing technology BMS system.
- Modular, can be compatible with a variety of housing.
- Standard CAN &RS485 communication port, can meet the require ment of several packages to connect in parallel, Master & Slave relationship, Monitor and other functions.Compatible with other brand inverters' communication protocols.

• Product Dimensions



• Technical Parameter

LFP-R 14.33kWh LiFePO4 Battery Module			
Specification			
Model	LFP-R 51280H		
Rated Voltage	51.2V		
Rated Capacity	280Ah		
Rated Energy	14.33KWH		
Cell Configuration	16S1P		
Battery Cell	3.2V280AH 16PCS (EVE LF280K)		
Life cycles (80%SOH,25°C)	6000 Cycles		
Certification	CE-EMC(EN 61000-6-2/-4) ;IEC 62619 ; UN38.3		
Standard Charge			
Operation temperature range ©charging	0~60°C		
Rated charge voltage	56.8V		
Max. charge voltage	57.6V		
Overcharge protection	58.4V		
Allowed MAX charge current	140A		
Peak charge current	150A		
Rated charge current	140A		
Recommend charge current	≤140A		
Standard Discharge			
Operation temperature range ©discharging	-30~60°C		
Output Voltage Range	44.8~57.6Vdc		
Recommend Working Range	46.4~56.8Vdc		
Discharge Cut-off voltage	44.8V		
Allowed MAX discharge current	280A		
Peak discharge current	280A		
Rated discharge current	140A		
Recommend discharge current	≤140A		

Mechanical Characteristics		
Dimension W*D*H	547*763*250 mm	
Weight (N.W.)	103±3Kg	
Weight(G.W.)	103±3Kg	
Storage and Transportation Requirements		
Storage Temperature	Less than 1month	-20~45°C
	Less than 6month	-10-30°C
Storage Humidity	45~75%RH	
SOC	Storage	60~75% SOC
	Transport	45~55% SOC

BD-DC

Bi-directional DC Controller Module

• Features

- Modular design for easy maintenance and expansion.
- Supports bi-directional energy flow, fast forward and reverse energy switching.
- Supports local EMS controller for intelligent energy control.
- Output voltage & current accuracy ±0.5%.
- Efficiency ≥95%.

• Technical Parameter

Bi-directional DC Controller Module	
High voltage side(DC busbar)	
Rated DC voltage	750V
DC voltage fluctuation coefficient	≤5%
Regulated voltage accuracy	±0.5%FS
Regulated current accuracy	±0.5%FS
Efficiency	≥95% (half to full load)
Rated DC current	80A
Rated DC power	60KW
Communication	RS485、CAN
Low voltage side(battery side)	
DC voltage range	200 ～ 680V
Rated DC voltage	600V
Regulated voltage accuracy	±0.5%FS
Regulated current accuracy	±0.5%FS
Ripple coefficient	≤0.5%
Rated current	100Adc
Rated DC power	60kW
General Data	
Protection Level	IP20
Temperature Range	-20~50℃
Dimension(W*D*H)	500*598*245mm
Humidity Range	0~95% (No condensing)
Cooling	Intelligent air cooling
Noise Level	<65dB
Altitude	＜ 2000m (>2000m Derating)

MPPT-M

Solar Controller Module

• Features

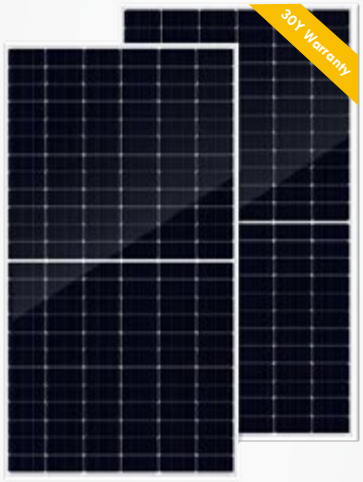
- Modular design for easy maintenance and expansion.
- Supports multiple inputs, easy and flexible configuration.
- Supports local EMS controller for intelligent energy control.
- Wide PV input range of 300V-800V.
- Efficiency ≥99%.

• Technical Parameter

Solar Controller Module	
Input	
Max. PV array voltage	1000V
MPPT voltage range	300-800V
Number of MPPT paths	4
Max. number of input strings per MPPT	2
Number of branch inputs	8
Max. branch current	13A
Output	
voltage range	800V (adjustable by the rear inverter)
Rated output current	80A
Max. output current	104A
Protection	
Reverse DC input protection	Yes
DC switches	Yes
Group string detection	Yes
Surge-protection	Class II (lightning protector)
Over-temperature protection	Yes (automatic derating)
Over-current protection	Yes
Over-voltage protection	Yes
General Data	
Max. efficiency	>99%
Power supply method	Self-powered
Cooling	Intelligent air cooling
Protection Level	IP20
Humidity Range	0~95%(No condensing)
Operating ambient temperature	-20~50℃
Storage ambient temperature	-25℃ -+70℃
Communication	RS485、CAN
Dimension(W*D*H)	500*568*155mm
DC input electronics type	MC4 (quick plug)
Inlet and outlet line methods	Rear in/out (with communication interface)

535W-550W Solar Panel

182M Half Cell



• Features

- Outstanding mechanical load resistance,2400 Pa wind load,5400 Pa snow load.
- Anti-PID(potential induced degradation),passed anti-PID test under 85% damp heat, 85% relative humidity for 96 hours.
- Passed salt mist corrosion test, ammonia corrosion test, dust&sand test, fire test, alcertified by TUV.
- Double electroluminescence (EL) tests.

Module Efficiency(%)	21.57		21.73		21.90		22.06		22.22		22.38		22.54	

Thermal Characteristics & Operating Conditions

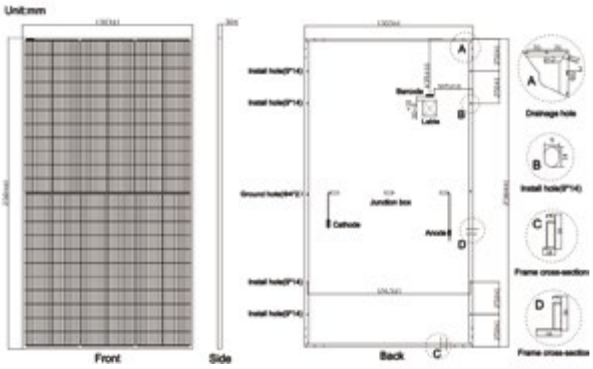
Maximum System Voltage(V)	1500/1000V
Maximum Series Fuse Rating(A)	25A
Power Tolerance	0~+3W
Pmax Temperature Coefficients(W/°C)	-0.240%
Voc Temperature Coefficients(V/°C)	-0.220%
Iso Temperature Coefficients(A/°C)	+0.047%
NOCT Nominal Operafing Cell Temperature(°C)	45±2°C
Operating and Storage Temperature(°C)	-40°C+85°C

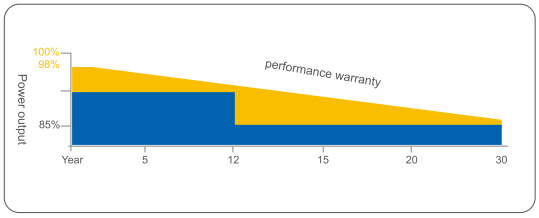
Thermal Characteristics & Operating Conditions

Front Cover(Material /Thickness)	low-iron tempered glass / 3.2mm
Weight	33.90kg
Cell (Quantity/Type/Dimensions	210*105 N Type Mono
No.of Calls	132(12*11)
Frame (Material)	Anodized Aluminium Alloy
Junction Box (Protection Degree)	IP67/IP68 3diodes
Cable (Langth/Cross-Sedional Area	4mm²cable 35cm+mc4

Packaging Specifications

- 20FT container 5Packages/185PCS
- 40HQ container 18Packages/666PCS





STC Irradiance 1000W/m² Cell Temperature 25℃ AM=1.5
NOTC Irradiance 800W/m² Cell Temperature 20℃ AM=1.5
