Lianyungang Tuopu Technology Co., Ltd. is a modern national high-tech enterprise, whose business covers the research and development, production, sales and construction of coatings and thermal insulation and energy-saving materials. The company's main products include a variety of coatings such as interior and exterior latex paints, water-based epoxy floor paints, and various waterproof coatings. The products have been tested by the National Quality Inspection and Testing Center, and all indicators meet the national standards.

The company actively introduces advanced foreign production monitoring equipment and technology, uses top-notch raw materials, and has implemented refined management of the entire process of production and sales since the establishment of the factory. It strictly controls product quality and has won the trust of many enterprises. At present, the company has more than 2,000 cooperative engineering cases and has established cooperation with more than 400 companies, undertaking a number of provincial and municipal high-quality projects. Among them, the new factory area and production base project of Composites Lianzhong Group in Lianyungang City won the national Luban Award, and projects such as Lianyungang Long-distance Bus Station and Ruian Garden Community won the Yangzi Cup Award.

With a good reputation, high-quality products, a professional construction team and a complete management and service system, the company is fully committed to building the "Tuopu" brand into a top brand in the industry.
