ZN550 Automatic Positive&Negative Thermoforming Machine

Technical Parameters&Quotation

Name	Automatic Positive & Negative Thermoforming Machine
FOB Price	Contact me on +86 13566187377(Wechat/Whasapp)
Mold Price	\$, depending on the molds
Complimentary Machine	Vacuum pump (60 m ³ /h)
Packing	First wrapped by film, then in export wooden boxes, then in container.
Payment Term	T/T, 30% pay in advance, the balance should pay before delivery.
Delivery Time	45 Working days after deposit and drawing confirmed.
Installation	We will send technicians to your country for machine installation, debugging and training. Accordingly, the buyer shall bear all expenses required by our technicians during their stay in your country, including round-trip air tickets, accommodation, and food. The technician's salary will be paid by us during one week of stay. If it exceeds one week, the technician's salary is paid by the customer. Costs \$120 per day.
Guaranty Terms	We seller guarantee the machines are new and the guarantee period will be given 12 months which starts from the date of the machine's arrival. During this period, the seller will provide free maintenance and free spare parts that caused by the machine's quality .

Functional Overview

This machine is a multi station automatic machine, solving the problems of food packaging hygiene standards. It not only works effectively in the production of PP, PS, PET, PVC and PLA plastic products, such as reducing capital investment, large labor input, complicated production process, lower hygienic security, etc, but also has extensive usage. It can be used in the production of PP, PS, PET, PVC, PLA plastic products using in metals, food, pharmaceutical, etc. All in all, this automatic positive and negative plastic containers making machine enjoys beautiful appearance and good price. It is popular with the customers at home and abroad.

Model	ZN550
Suitable Products	Disposable Plastic lids/covers, clamshell boxes, plates, (egg) trays , containers, etc.
Suitable Material	PP, PS, PET,PLA, PVC, EPS
Max. Width of Material	580mm
Max. Forming Width	550mm
Max. Forming Length	350mm
Max. Forming Depth	80mm
Max. Cutting Speed	10-25 Cycles/min
Material Thickness	0.1mm-1.2mm
Main Power	49KW
Power	380V/ 50HZ (Three-phase and four-wire)
Pressure of Water Supply	0.2MPa
Water Consumption	0.3m3/h (Tap water or Circulating cooling water)
Air Exhaust Volume	≥0.8m3/min
Air Pressure	0.6-0.8MPa
Machine Install Size	8200×3000×2400mm
Machine Packing Size	6000×2000×2300mm
Weight	5500KG

Remark: Due to technical improvements, the manufacturer reserves the right to modify the above parameters and functions without prior notice.

No.	Name	Brand and state
1	Programmable Logic Controller (PLC)	Using INOVANCE PLC programmable control and man-machine interface INOVANCE 10 inch color touch screen operating system, which can greatly improve the stability of each movement process and response speed.
2	Touch Screen	INOVANCE 10 inch color touch screen
3	Planetary Gearbox	Chinese brand
4	Vacuum pump	60m ³ /h
5	Water chiller	Need a 5HP industrial water/air chiller
6	Relay	Schneider
7	Solid State Relay	Yangming (Taiwan)
8	Solenoid valve	AIRTAC (Taiwan)
9	Transtecno	INOVANCE
10	Heating system	The furnace is 3 times length of the forming station, made of heat-resistant stainless steel. We use far infrared ceramic heaters (Chinese brand) and heat-resistant wire with current overload protection to ensure that difficult materials and high-temperature resistant materials are heated evenly. The qualified rate of finished products reached 99.9%
11	Temperature control system	INOVANCE temperature module thermostatic control with memory, one-key full control of temperature rise, one-key full control of temperature drop
12	Sheet loading	Double rods automatic feeding coil device,which can reduce the frequency of changing sheet rolls and improve the efficiency. It can hold about 600kg.
13	Surface Process	Using sliding doors made by tempered glass and all metal surfaces are treated with anti-rust, which can reduce the noise and is easy to clean.
14	Bearing	GCr15 Steel, high and even hardness and high wear resistance and fatigue resistance
15	Servo forming station	5 fulcrums station, which is more stable. It is controlled by an independent servo motor, 4.4kwr. Besides two 100 L(liter) air tanks for positive and negative pressure, which is more precise and the bottom will be more perfect. The max forming area is 550*350 mm and the max forming depth is 80 mm (adjustable). We can increase the height according to your requirements.

17	Servo cutting station	Five fulcrums station, more stable Servo motors 4.4kw, 80T cutting force. Easy-operation laser knife.
18	Servo punching station	Use a cylinder and Easy-operation laser knife.
19	Servo feeding system	3kw INOVANCE servo motor
20	Servo stacking system	Controlled by a 1.8kw INOVANCE servo motor, Automatic counting and stacking with one 20 L air tank

Servo Motors Details

Brand: INOVANCE(China)

Forming Station	4.4kw
Punching Station	/
Cutting Station	4.4kw
Stacking Station	1.8kw
Pulling/Feeding	3kw
Total	4 PCS

Note: Brand can be customized according to customer needs.

Machine Configuration List

NAME	BRAND
Touch Screen	INOVANCE China
PLC	INOVANCE China
Encoder	Korea
Relay	Schneider France
Proximity switch	Schneider France
power switch	Schneider France
Servo Motor	INOVANCE China
Temperature module	Hexin China
Circuit breaker	Schneider France
Button switch	Schneider France
Emergency stop switch	Schneider France
Solenoid valve	AIRTAC Taiwan
Cylinder	AIRTAC Taiwan
Solid state relay	Yangming Taiwan
Reducer	Tongli China
Pressure reducing valve	AIRTAC Taiwan

ABOUT US

Ruian Bocheng Machinery Co., Ltd. is established in 2008, and is located in Binhai Industry, Ruian city, Wenzhou, Zhejiang Province, China.

Based on market orientation and technology, we has vigorously designed and developed new products since it established.

With professional designers and production engineering technicians, we are specialized in producing full-automatic four stations plastic thermoforming machines, plastic lid forming machines, plastic vacuum forming machines, especially for making PLA & transparent PP package products. We seek for continuous innovation and development by integrating the stability and superiority of European technology, and take the customers' actual needs as the core designing concept for a long time, which improved our designs day by day and made our designs more effective and stable.

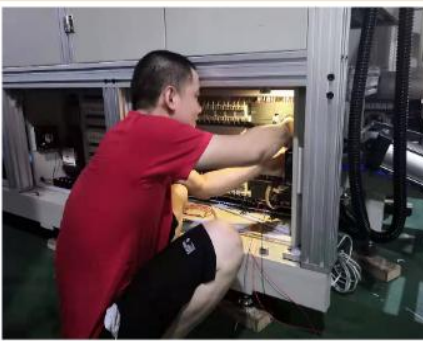

As a comprehensive company, we collect all the knowledge and resource and serve our customers with complete solutions in our area of plastic industry in order to create more economic value and offer the one-step service. We have passed several quality certificated systems and CE safety certificated system, and pay high attention to the new product innovation with rich technology and capital resource. We design and devolop at least one set new machine each year. Our machines have been widely used in many countries, such as Germany, France, Albania, Poland, Macedonia, Chile, Argentina, Ecuador, Middle East, Middle Asia, Southeast Asia, Africa and etc. We think it is the only way to achieve self-worth by creating value for customers. We look forward to cooperating with you.
