

# 100% Waterproof Pergola Drainage System

Stay Dry Even In Heavy Rain

100% Waterproof  
Hidden drainage system

Wind Resistance  
120 km/h

Full Aluminum  
Rust-free structure

Heavy-Duty Structure  
Reinforced frame

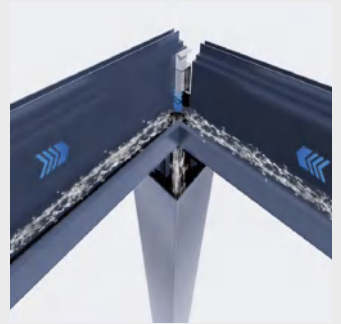

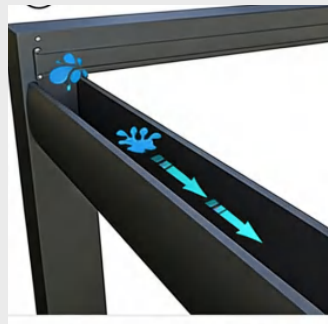

Manual & Motorized  
Optional smart control

# Advanced Pergola Drainage System

Engineered for 100% Waterproof Performance in All Weather Conditions

## Key Advantages :

- ▶ Hidden Integrated Drainage Design
- ▶ No Visible Pipes, Clean Appearance
- ▶ Ideal for Heavy Rainfall Regions

# How Does the Water Drain in Heavy Rain?

When choosing a pergola, one of the most important concerns is water management :

- ▣ Will rainwater leak through the roof?
- ▣ Where does the water go?
- ▣ Can it handle heavy rainfall conditions?

Our pergola solves all these problems with a fully integrated drainage system.

# Drainage Flow

Rain → Louver → Gutter → Post → Ground

Smart Hidden Drainage System

# Structure Detail

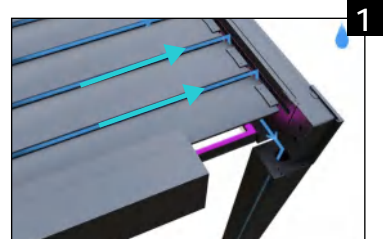

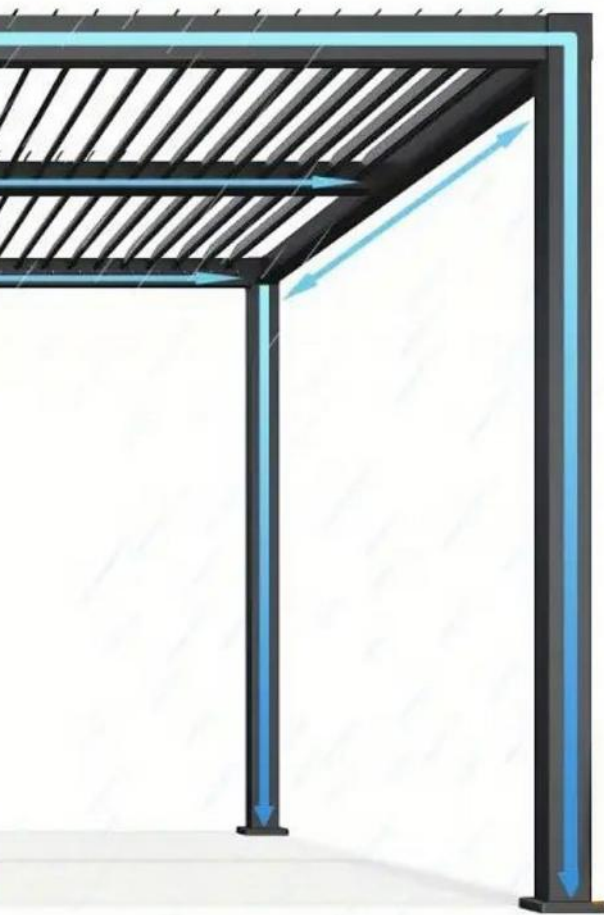

## Fully Integrated Internal Structure

**Our pergola is engineered with a concealed drainage system inside the structure:**

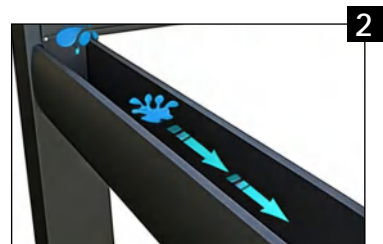

- ▀ Integrated gutter within the beam
- ▀ Hidden water channels inside the posts
- ▀ Seamless connection between components

**Key benefit:**

- ▀ Clean architectural appearance
- ▀ Long-term durability
- ▀ Minimal maintenance

o Louver

o Gutter

o Post

# 100% Waterproof Performance

Designed for 100% Waterproof Performance

- ▣ Overlapping louver design prevents water penetration
- ▣ High-precision sealing system between blades
- ▣ Stable performance under heavy rain conditions

## Suitable for :

- ▣ Tropical climates
- ▣ Monsoon seasons (India, Southeast Asia)
- ▣ Coastal and high-humidity environments

Stay dry and comfortable  
in any weather.

---

# Competitive Advantage

Why Our Pergola Is Better

Our Premium Pergola	Traditional Ordinary Pergola
Hidden drainage system	External exposed drainage pipes
No visible pipes, clean modern design	Ugly exposed piping, less aesthetic
Efficient water flow circulation	Poor water control & slow drainage
High-end engineering, stable durable	Easy water leakage risk, hidden danger

# Real Project Proof

Proven Performance in Real Projects

**Our pergola systems are installed in multiple countries with demanding weather conditions :**

- ▶ Reliable performance in heavy rainfall
- ▶ Trusted by global clients
- ▶ Suitable for residential and commercial use

Singapore 

Size: 4\*4
