■Instructions of installation.

1. Ensure mains supply is switched off during the whole installation period.
Dug a hole according to the dimension of the mounting sleeve and below drawing "1", also make the tube for the cable in.
Put a layer of gravel and sand at the bottom of the hole. This to obtain a good drainage of the underground light.
Place the mounting box in the desired position, then fix it with the concrete.
2. Remove the sealing cover with a screw driver after the concrete is dried.
3. Use the IP67 /IP68 waterproof connector to connect the LED linear light to the driver's wires that's with specific voltage output. Push the fixture into the mounting box.
4. Ensure everything is installed very well, and then turn on the power for the wall washer application.

Take out the linear light fixture with the provided tools when repairing or replacing fixtures.
