

WHY ALUMINUM PACKAGING

ECO-FRIENDLY ALUMINUM PACKAGING

The weight of Aluminum cans is about one-tenth as much as similar-sized glass bottles, and its lightweight packaging reduces the environmental burden. By changing from glass bottles to small bottles, the same capacity is lighter and smaller than glass bottles, which can improve the logistics and transportation efficiency and reduce the material costs and transportation costs.

Portability

Reduce cost
Including material cost and transportation cost

10x lighter aluminum

Transportation efficiency
Lighter packaging means better transportation efficiency and thus saves in transportation costs.

REDUCE EMISSIONS
Lighter weight improves transportation efficiency and thus reduces greenhouse gas emissions.

"Easy to recycle" is one of the remarkable characteristics of aluminum. Therefore, compared to other containers, aluminum can recycle consumes the lowest cost and achieve maximum recycling. It has excellent economy and helps to save resources.

Reduce packaging cycle time
The time from discarding aluminum boxes to recycling is about 60 days

Reduce CO2 emissions
Using recycled materials to produce boxes can reduce energy consumption by 95% compared to using raw materials directly

100%recyclable
70% of aluminum boxes are recycled after being discarded

Aluminum 20000yuan/ton
Plastic 2000 yuan/ton
Glass is not recycled

Aluminum

- High recycling
- Superior isolation
- Long service life
- Lightweight and unbreakable
- Low transportation cost

Glass

- Low recycling
- Risk of light penetration
- Long service life
- Heavy and fragile
- High transportation cost

Plastic

- Difficult recycle
- Determined by material
- Easy to aging
- Lightweight and unbreakable
- Low transportation cost

USE THE SIMPLEST AND MOST ENVIRONMENTALLY FRIENDLY MATERIALS TO MAKE THE BEST PACKAGING

The metal texture of aluminum is advanced, and the surface can be processed in a variety of ways, greatly expanding the designer's ideas, so as to develop a more unique design and better fit the brand. Aluminum also has many advantages in packaging, integrated molding, strong barrier protection; No rust; Light weight, strong and unbreakable; Green environmental protection and so on. Compared with glass and plastic packaging, it gives people a completely different feeling of use, and there is no packaging of the same kind in the market.

THE WORLD'S LEADING ALUMINUM PACKAGING INNOVATION ENTERPRISE

Guangzhou Merrynewon Packaging Technology Co., Ltd. is an innovative packaging enterprise integrating the design, R&D and production of aluminum packaging products. It focuses on the R&D and production of aluminum packaging, and advocates green and sustainable packaging.

Cycle development. With an independent research and development team, a variety of services run through the aluminum packaging product design, research and development, manufacturing and other packaging development links, providing customers with a full range of product packaging support.Merrynewon Packaging Technology sticks to the path of "Product -based , Cooperation and symbiosis , innovative develop-opment", adhering to the corporate values of "embracing change, continuously adding value, being precise and realistic", striding forward in the hot packaging market. In the future, Merrynewon Packaging Technology will continue to be deeply involved in the packaging industry, continuously optimize R&D and production, and make continuous efforts to enhance the value of the industry.

9

9 years experience in aluminum packaging design

1000+

Has thousands of sets of aluminum can mold

10000m²

It has 10000m² production and R&D base

3000m²

With 3000m² warehouse and a large number of spot

200000+

daily output can reach more than 200,000

5000+

Has provided long-term packaging service support for 5000+ enterprises at home and abroad

R&D OF PACKAGING

The company need to develop new aluminum packaging products, Mr. Chen focus on the R&D team of Merrynewon, One-on-one product manager matchmaking,process discussion, exchange of ideas, program development. Designers are involved in projects to efficiently develop specific processes, which can eliminate high proofing and R&D costs

Fast proofing, landing production

Merrynewon equipped with a variety of process machines, to make a variety of process samples in the fastest timeConfirmation of samples can be arranged for mass production

PRINTING CUSTOMIZATION

Mr. Chen intends to explore the market and develop new brand packaging, then he chooses Merrynewon personalized customization service.Matching orders online, standardized drawings with ERP management system, accurate communication of customization requirements, and processing on the basis of inventory specifications with minimum time and cost to get personalized packaging.

QUICK SPOT

We have 3,000 square meters warehouse, equipped with a large number of inventory, matching the advanced ERP inventory management system, quick response on and offline, fast shipping

As a professional aluminum packaging innovation enterprise, we have abundant specifications and sufficient inventory. The stock specifications are up to 100 sizes,for the common specifications on the market is equipped with a large number of stock to meet the needs of customers.

REGULAR STOCK PRODUCTS - UNLIMITED MOQ

* In-stock inventory is updated from time to time, for more information, please contact the business manager!

CUSTOMIZATION PROCESS

1 Communicate your requirements/ Confirm your requirements

2 Select Specification/ Confirm specification

3 Confirmation of product process and quantity

4 Check Calculate Quote

5 Product Proofing/ Confirm proofing

6 Mass production

7 Deliver the product

PROCESS SUPPORT

SCREEN PRINTING
Suggested
MOQ: 1000pcs

Support 1-4 colors, Concave-convex texture premium Suitable for high grade, rich effect products

STICKER LABEL
Suggested
MOQ: 1000pcs

Low cost, fast production No color restrictions, rich colors

HOT STAMPING
Suggested
MOQ: 1000pcs

The processproduces asheiny, reflectivefinish thatenhances thevisual appeal ofan area.

EMBOSSING ENGRAVE
Suggested
MOQ: 3000pcs

Concave and convex three-dimensional high-end, highlight the brand image Increase layered

COLOR PRINTING
Suggested
MOQ: 5000pcs

No color restrictions, rich colors High film charge, suitable for mature brand

SPRAYING PAINT
Suggested
MOQ: 5000pcs

Support single color customization only Bright color, smooth surface

ELECTROPLATING
Suggested
MOQ: 5000pcs

Support single color and 2-3 color gradient Can be made in a variety of fantastic colors

OFFSET PRINTING
Suggested
MOQ: 50000pcs

No color limitation, various effects Integration of the design and the bottle, with high quality texture

HEAT TRANSFER PRINTING
Suggested
MOQ: 5000pcs

No color limitation, bright colors Suitable for high-grade products with complex patterns.
