

Berserker Series-3060

ISUZU SERIES ENGINES

HOSE SIZE
75M 1/2

High pressure pump

Berserker Series-3060

BS3060

Water tank: /
Size: 160 * 85 * 99.5CM
Pressure/Flow (Europe):
300bar 60lpm
Pressure/Flow (USA):
4300psi 100gpm
High pressure pump material:
stainless steel
Gearbox: 09G
Engine:
Isuzu diesel engine 50HP
Water injection hose size: 4 points
Wireless remote control:
RS4 remote control OLED screen remote control
Wireless valve:
supports 200 meters
Fuel tank capacity: 25L

Multifunctional control remote control

Rs4 system

Hose Size: 1/2"
Applicable pipes

2-16 inch

made in China

1 year warranty

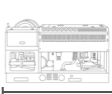

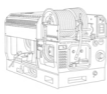

Single person operation

BS3060

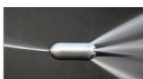

Pro Fiber Hose

200-meter remote control range in open areas.

Nozzle Selection Guide

Business model 300bar60lpm

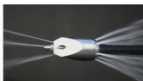

Mini Pagoda Nozzle
Rotating nozzle, suitable for cleaning grease buildup in residential main pipes

Pro Low-Angle Jet Nozzle
The rear spray angle is small, and because the amount of water sprayed is small, it has concentrated impact and strong penetrating power. It is suitable for commercial pipelines and can smoothly flush away debris and oil sludge.

Penetrator Pro Nozzle
Rotating nozzle made of special alloy material, designed to handle light concrete or cement deposits and heavy grease blockages. Suitable for pipes with a diameter of 150 mm

Diamond Drill Nozzle
The front three nozzles spray water to break down municipal sludge and undog blocked pipelines.

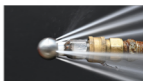

Rocket Nozzle
1 front and 6 rear jets. The rear jets feature a narrow spray angle, concentrating water flow backward to generate maximum thrust — ideal for long-distance pipe propulsion

Residential model 300bar30lpm

Mini Low-Angle Jet Nozzle
Equipped with more rear jets at a narrow spray angle, ideal for wide-area pipe flushing and long-distance hose propulsion.

Thumb Nozzle
It can navigate turns in smaller diameter pipes. The rounded design minimizes the risk of getting stuck during bends

Root Cutting Nozzle
Designed to tackle roots and stubborn grease in main residential drain lines

Small puncture Nozzle
Mainly used for long-distance propulsion of hoses. Suitable for cleaning blocked residential sewers.

Compatible with all modes Camera nozzle / DIY nozzle

Camera nozzle
Perfectly combined with sewer cameras for better long-distance pipeline inspection. Made of aluminum alloy.

DIY Multi functional nozzle
You can install different inserts to change the spraying pattern. Unlock new spraying modes through various DIY configurations
