

Warrior PRO -1865

HOSE SIZE
75M 1/2

ENGINE:SV1000(37HP)

High pressure pump

Warrior PRO Series

WS1865-pro

Water tank: 500L
Weight: 370KG
Pressure/Flow (Europe):
180bar/9Lpm
Pressure/Flow (USA):
200psi/11gpm
High pressure pump material:
Meister stainless steel from Germany
Transmission: 09G
Engine: SV1000
Injector hose size:
1/2 model 75 meters
Water injection hose size: 4 points
Wireless Remote Control:
RS3 Remote Control OLED Screen Remote Control
Wireless valve:
supports 200 meters
Fuel tank capacity: 20L

Multifunctional control remote control

Rs3 system

HOSE Size: 1/2
Applicable pipes

2-16 inch

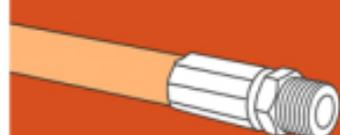

made in China

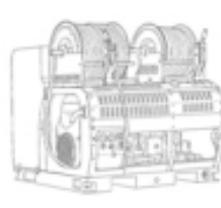

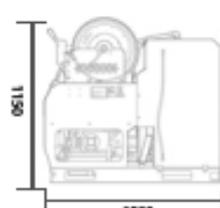

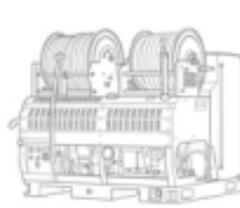

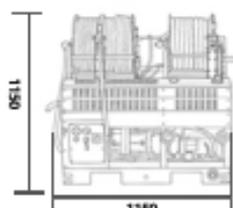

1 year warranty

Single person operation

WS1865-PRO

Bulletproof vest material hose

200-meter remote control range in open areas.

Nozzle Selection Guide

Tornado Nozzle
Rotating nozzle, shaped like a tornado, with wide coverage, suitable for cleaning silt and mud from large pipes, rotating to clean oil sludge and fine sand.

Mini Pagoda Nozzle
Rotating nozzle, suitable for cleaning grease buildup in residential main pipes.

King Blaster Nozzle
This nozzle has a chain that can rotate at high speed, effectively cleaning hard objects adhering to the DN100 pipe wall. It has a blade at the front that can be replaced and can also break down oil stains.

Small mines Nozzle
Suitable for 100-300MM mine nozzles with a large angle rear spray design, with the first hole spraying water and the last 6 holes spraying water.

Pro Low-Angle Jet Nozzle
The rear spray angle is small, and because the amount of water sprayed is small, it has concentrated impact and strong penetrating power. It is suitable for commercial pipelines and can smoothly flush away debris and oil sludge.

Thumb Nozzle
The exterior design is relatively rounded, allowing it to turn in smaller pipes. When turning, its rounded design prevents it from getting stuck in the pipe.

Camera nozzle
Perfectly combined with sewer cameras for better long-distance pipeline inspection. Made of aluminum alloy.
