1. PRODUCT OVERVIEW

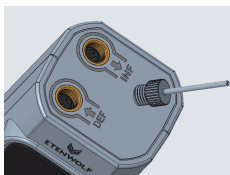

- 01 Pressure value
- 02 Preset modes - Rugby, American football, basketball, manual use, inflation
- 03 Battery indicator
- 04 Pressure unit
- 05 Target input value
- 06 "U" unit button - BAR/PSI/KPA
- 07 "M" mode button
- 08 Power Button
- 09 "+" button
- 10 "-" button
- 11 Inflation port
- 12 Deflation port
- 13 USB-C charging

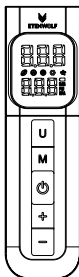

2. QUICK START GUIDE

STEPS TO INFLATE YOUR SPORTS BALL

1. Take a needle , and connect it to the inflation port (clockwise rotation)
2. Choose the appropriate pressure mode and adjust to the target pressure.

Note: The pump will automatically turn off when the needle and ball connects to the wrong port (deflation port) to inflate.

3. Press the power button to begin releasing the air.
4. Press the power button again to manually stop the deflation.

Note:

The pump will stop every 20 seconds in deflation mode. To continue deflation, press the power button again.

Note:

1. When in deflation mode, there is no target pressure setting and users need to stop the pump manually.
2. Deflating a ball completely can sometimes cause the leather or synthetic panels to separate and ruin the ball. Deflate it slowly and keep an eye on the ball.
3. Because the pump sensor's minimum pressure is 3 psi, the Display pressure will show 0 when pressure is below that level.

3. AIR PRESSURE REFERENCE TABLE

Type	Pressure range	Recommended pressure
Rugby	7-11PSI	9PSI
American football	8-16PSI	13PSI
Basketball	6-10PSI	8PSI
Manual	3-17PSI	Manual
Inflation mode	-	-
1 Bar = 100 KPA = 14.5 PSI		

Note:

1. To avoid injuries from bursting items due to over-inflation, make sure you are aware of the maximum inflation pressure before you start.
2. The recommended air pressure for American footballs, soccer balls, basketballs, volleyballs, and other balls is indicated near the ball's air valve.
3. Pump cannot inflate items with pressure below 3 PSI, because it is under the pump's minimum pressure limitation.

4. BUTTON OPERATING GUIDE

POWER BUTTON

ON

long-press for 2 seconds to turn on.

OFF

when the pump is turned on, long-press 4 seconds to turn off.

Pause

when the pump is inflating/deflating, press the button to pause the machine whenever you want

Note:

The pump will turn on when connecting with a charger.

The pump will automatically turn off in the cases below:

1. Five minutes of inactivity.
2. When the charging cable is disconnected by accident during charging.
3. Five minutes of inactivity of after being fully charged.
4. When inflating balls over five minutes, but the target pressure value is still below 2.5psi. (need to check whether there is a misoperation or air leak)

"M" MODE BUTTON

Press the "M" button to switch between the five inflation modes below

"U" UNIT BUTTON

Press the "U" button to switch between the three units below

BAR/PSI/KPA

"+, -" PRESSURE ADJUSTMENT BUTTON

Press + or - to increase or decrease the target pressure value. Press and hold the + or - button to quickly adjust the pressure value.

5. PACKAGE CONTENTS

SPORTS MATE P200

6. BATTERY LEVEL INDICATOR AND CHARGING

BATTERY LEVEL INDICATOR AND CHARGING

The battery level is shown by color.

White = between 30% - 100%

Orange = between 10% - 30%

Orange flashing = under 10%

CHARGING

Fully charge the pump before using it for the first time. To take responsibility for protecting our planet and leading on eco-friendly life, the USB charger is not included. Please connect it to a certified USB charger (5V/2A) with the charging cable.

While charging:

Orange flashing = under 30%

White flashing = between 30% - 100%

White Solid = fully charged

Note:

1. The pump will automatically turn off if it is inactive for five minutes after being fully charged.
2. The pump cannot be used while charging.

7. TROUBLE SHOOTING

Problem	Solution
Slow inflating speed	1. Check whether the battery level is sufficient. 2. Check whether the ball needle is screwed tightly. 3. Check whether the item inflated is leaking.
Ball pump turns on, but does not inflate	1. Check whether the battery level is sufficient. 2. Check whether the pressure of the item being inflated exceeds the preset pressure.
The pump inflates normally but the displayed pressure is zero	If the air pressure under 3 PSI, the displayed pressure will show zero due to the pump's minimum pressure range.
Unable to increase or decrease the preset pressure	Make sure the correct mode is chosen, and the preset pressure does not exceed the range.
The battery level indicator is different when inflating compared to the standby state	The lithium battery's voltage level significantly drops when discharging power, causing the battery level indicator to have a different display when inflating compared to standby state. It is a normal situation.
The battery level indicator does not show on the screen after charging	Use a certified adapter and the included charging cable, and try charging again.

8. SPECIFICATIONS

Name	Ball pump
Model	Sports Mate P200
Executive Standard	ANSI B40.7
Dimensions	6.71"*1.85"*1.73"/170.4mm*46.9mm*44.0mm
Inflation Pressure Range	3~17psi/0.2~1.17bar
Operating Temperature	Charging: 32°F~113°F/0°C~45°C, Discharging: -4°F~158°F/-20°C~70°C
Storage Temperature	-4°F~113°F/-20°C~45°C
Battery Capacity	P200 2,000mAh(7.4Wh)
Working Noise	Lower than 70dB within 1 meter
Input	5V/2A
Input Port	USB Type-C
Charging Time	P200 1 hour
Sensor Accuracy	±0.3psi

9. SAFETY INSTRUCTIONS

- This product is not a toy and should not be used by children. Users should be above 16 years old.
- Keep a safe distance between children and the inflator while inflating. There is a built-in lithium battery inside the product. Don't place the product into fire or dump the battery.
- Overheating, damage, or water may increase the risk of fire or explosion. It's best to keep the product away from heat sources and not leave it for prolonged periods in a hot car. If the inflator becomes very hot, there is a chance it could explode.
- Please store the product within temperatures ranging from -4°F to 113°F / -20°C to 45°C . Extremely hot or cold environments may damage the battery and shorten the lifetime of the inflator. Long-time storage of the product may decrease the effectiveness of the battery. Charge the inflator at least once every three months to maintain its performance.
- The product has a built-in DC motor which may generate sparks during operation. Do not use it in an environment with dust or gas that is liable to explode.
- If there is an unusual noise or the temperature becomes very high during inflating, please turn off the inflator immediately.
- Before setting the inflation pressure value, make sure the pressure unit is correctly selected. Mixing up psi and bar could lead to dangerous overinflation.
- Unit conversion: 1bar = 14.5psi, 1bar = 100kPa.
- Do not leave the pump unattended while it is in operation.
- Please use the product in a dry and clean environment. The intrusion of sand and dust may cause damage to the product. Don't wash the product with water.
- Please use a certified 5V/2A adapter and the included charging cable to charge this product. Malfunction caused by actions not in accordance with the above requirements is not covered by the warranty.
- To reduce the risk of electric shock, do not expose to rain. Store indoors.

10. WARRANTY

2-YEARS COVERAGE

Within 2 years of purchase, we will provide timely and effective online after-sale service. We will repair or replace any defective product (due to manufacturing fault) within this warranty period.
