WHEEL HUB

WHEEL RIMS

INNOVATOR OF LIGHTWEIGHT

The product has light weight and high safety performance, and the weight is about 15%-20% lower than that of traditional low-pressure casting products, and the mechanical properties are better than the performance indicators of traditional casting products.

WHEELS ADVANTAGES

Reduce fuel consumption
and improve battery life

Light steering and good
handling

Improve braking and
reduce risk

Reduce vehicle weight

In the past 7 years, the company and the team invested a lot of money and time, focusing on the research and development of various types of automobile wheels, including new energy vehicles, professional drag racing, off-road vehicles, and ordinary passenger cars, etc. The company's products have been loaded into a large number of domestic off-road vehicles and new energy vehicle manufacturers, while exporting products to Europe and the United States, and with well-known American brands: In-depth cooperation with FORGIATO, WHEELPROS, CWH, etc.

FUSION FORGED 1PC - LIGHTWEIGHT
