Shipping

01

Raw Material Annealing

The wire is spheroidized annealed (hardness $\leq 72\text{HRB}$) which increases the cold heading efficiency by 20%

02

Raw Material Wire Drawing

Ensure that the material is filled evenly during the subsequent cold heading and reduce the risk of head cracking.

EQUIPMENT

03

Thread processing

Processing standard threads on the rod, divided into "rolling forming" and "cutting forming"

04

Heating Line Of Screw

Through heating-cooling control, the strength (tensile and shear resistance) and hardness (avoiding thread stripping and breakage) of the screws can be improved.

EQUIPMENT

SERVE QUALITY TEST

Screw Torque Test

Salt Spray Test Machine

Salt Spray Test Machine

Length Measurement

Packaging warehouse

Nearly 1,200 of storage space.

Ten thousand sets of standard pallets, efficient turnover.

Layered shelves, clear classification and easy access.

Mark Head

Sinsun can mark letters on the screw head according to your needs.

Customized service

Sinsun provides professional screw logo customization services.

Custom size

We can customize the size, length and weight according to your needs.

Design logo

Product logo engraving and packaging logo design, to help you enhance your brand image and market competitiveness.

3D Package show

3D modeling output renderings within 48 hours.

High quality plastic cans

Hanging plastic packaging box

Plastic Box

Color box packaging

Small PE bag

Bulk 25 kg bags

Our customers are all over the world
