Density Monitor

ZMJ60XDR Density Monitor

Description

ZMJ60XDR Density Monitors are used to monitor SF₆ gas density in sealed tanks. They are applied to indicate the gas density and to provide signal outputs when the density reaches the set values. Furthermore, it can transmit the real-time SF₆ gas density data remotely, to achieve online remote monitoring function. They are designed to monitor High Voltage systems. They can provide multiple solutions to support new substations and the renovation and upgrading of existing substations.

Features

- Higher accuracy from reference chamber temperature compensation technology.
- Suitable for indoor or outdoor installation.
- Micro-switch that can switch freely between normally open and normally closed points.
- Up to 4 pairs of switches, multiple options such as double alarms and double locks can be realized, making monitoring more secure and reliable.
- High shock resistance, reducing need for oil and the potential hazard of oil leakage.
- Normally closed contact will not false alarm due to vibration.
- RS485 bus interface, easy to expand current system for telemetry and remote control functions.
- Strong EMC capability.

Optionals

- Measuring Medium: SF₆, Air, N₂, SF₆+N₂ and other gases

Application

- SF₆ Gas Insulated Switchgear (GIS)
- SF₆ Insulated Circuit Breaker
- SF₆ Insulated Pole-Mounted Switch
- SF₆ Insulated Transformer
- SF₆ Insulation Current Transformers or Voltage Transformers
- SF₆ Insulated Bus System
