

JINBEIER

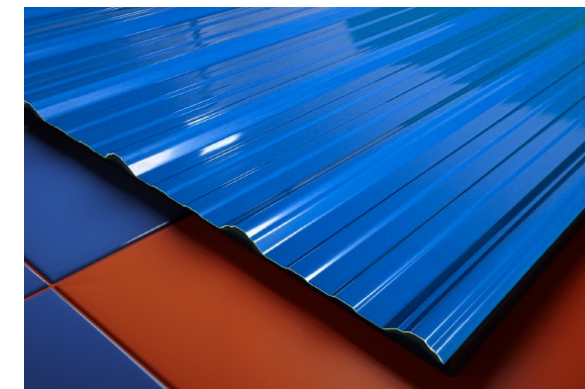

China's leading PVC
roofing & cladding manufacturer

ABOUT US

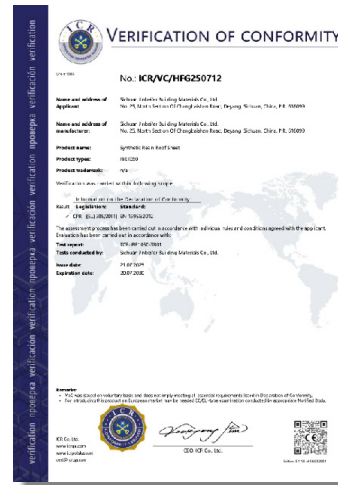

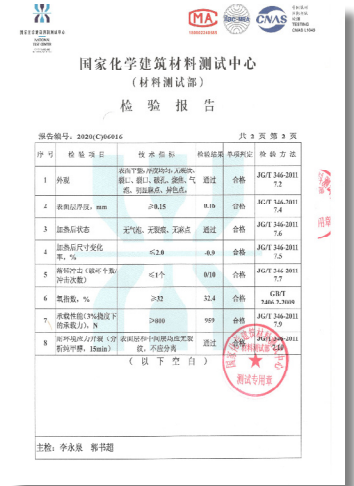

Sichuan Jinbei'er Building Materials Co., Ltd. is a leading manufacturer of the ASA synthetic resin tile,PVC roofing and cladding sheets in China,established in 2009.Our factory is located at self-owned property of land in Deyang hi-tech industrial park,Sichuan Provance.We focus on new building materials,supporting accessories and pursuing innovation and excellence all the time.

We grow rapidly in the past years, our products are rich in colors and presenting durable, beautiful shapes with a strong three-dimensional sense. The advantages of our products are not only fire-proof,high temperature resistance, corrosion-resistant, light-weight, tough and easy to install. It is an ideal material for various types of permanent building roof decoration and waterproofing.

We have a very good reputation in China and SEA markets for quality products at competitive price, not to mention our professional team. We're also developing new markets and clients in other regions. Welcome to contact us! Roof tiles with lifelong service and maintenance!

WHY CHOOSE US

Guaranteed quality&Rich experience

Over 20 years production experience and using ultra-high weathering engineering resin (BASF ASA) as the surface material, the quality rigid PVC as the basement material.

High production capacity

Over 10 production lines and the production capacity of roofing tiles has reached 50,000 square meters per day. Annual Sales volume has reached 30000 -ton.

Integrity Management

We promise that all of our products are made of virgin materials. Under honest business principles,we got the tustworthy certifications by several ognizations for years.

Cost-Effective

Our products' performance beyond its' price. And by cutting cost of supply chain, it can improve product competitiveness at the retail trading derectly.

Professional R&D team

R&D team give strong suport to the before and after-sales service. On the basis of it,we're constantly innovating and developing better new materials.

SGS verification and MSDS test

We provide high quality products through strick inspection before they go out and will go down well for sure in the market.

OEM & ODM

With our factory's rich manufacturing experience and professional technology research and development team, whether OEM or ODM is our competitive advantage.

CERTIFICATIONS & HONORS

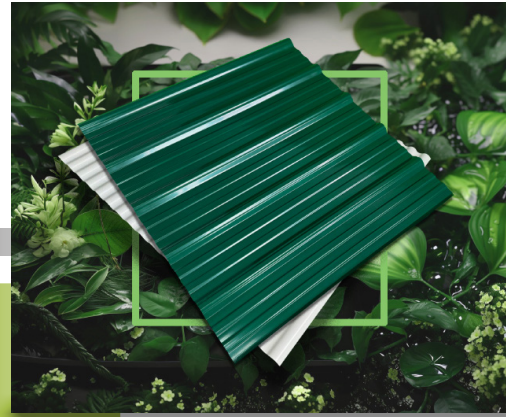

AUTOMATIC MANUFACTURING

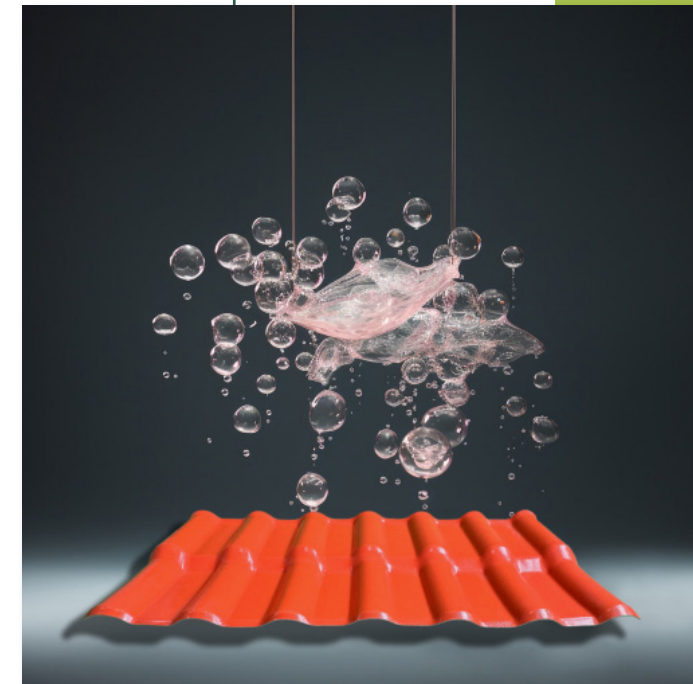

Our company has been equipped with advanced fully enclosed pipeline transportation machine, automatic batching and feeding system to create a clean production environment and a stable products quality.

WHY CHOOSE PVC

PVC roofing sheets are almost new to roofing industry. The sheets made of Rigid, Unplasticized polyvinyl chloride or Polycarbonate: is lightweight, flexible, durable and beautiful. They can be installed on any roof in any location such as: villa, house, factory, chemical warehouse, car park and farming, etc.

ADVANTAGES OF PVC ROOF SHEETS

1 - Durable

PVC roofing sheets are resistant to rot, mold, and mildew, making them a durable option for various weather conditions. They endure strong wind speed - category 3 hurricanes.

2 - Waterproof

PVC roofs have a non-absorbent layer and prevent water penetration. So they are safe especially for poultry and livestock farming, etc.

3 - Anti-UV

The top layer of PVC roof tiles are made of Acrylonitrile Styrene Acrylate copolyme - to increase the resistance against UV. This prevents color of the roof from fading. Besides that they can endure high temperature and cold.

4 - Fire proof

Nowadays, chances of buildings getting fire and explosive substances hitting the roofs are increasing. PVC roof sheets are non-combustible and fire-retardant materials and are the best choice for any roof structures.

5 - Anti corrosion

PVC roofing sheet is the best option for buildings in coastal areas - as you do not need to have extra layer against rust and corrosion. (Especially better than metal roofs). It is also resistant to chemicals, acid and salt.

6 - Heat insulation

They are great roofing materials for hot and cold climates. PVC roofs are heat proof and an Energy-efficient roofing sheets and it does not need extra heat insulation.

7- Noise absorption

PVC roof sheets can help reduce noise from rain and other external sources, providing a quieter indoor environment. If you don't want let rain and hail ruin your day, sound insulation of the upvc roofing sheets can suit your needs very well.

8 - Low-maintenance

Busy homeowners always love to choose the most low-maintenance roofing and cladding materials. PVC roof sheets require minimal maintenance compared to metal shingles, as they typically do not rust or corrode. They are also easier to clean.

9 - Low infrastructural cost

Jinbeier(our company name) sheets are often more cost-effective than other metal ones, making them a budget-friendly option for homeowners.

10- Long life

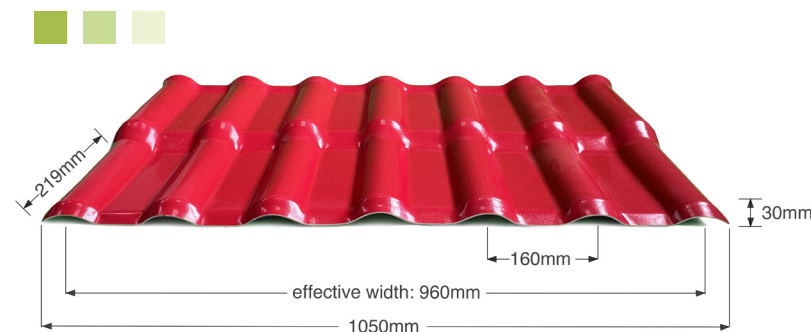

Another important advantage of our PVC roofing sheets is their long life expectancy. They are strong and impact resistant roof tiles and have the average lifespan of 30 years. Durability of PVC sheets against high heat and cold can save you from extra costs – in the future.

11- Environmental-friendly

The type of UPVC roof sheets we manufacture, are eco-friendly and original. Since this roofing materials have no asbestos or any dangerous chemicals, they are harmless and can be recycled easily.

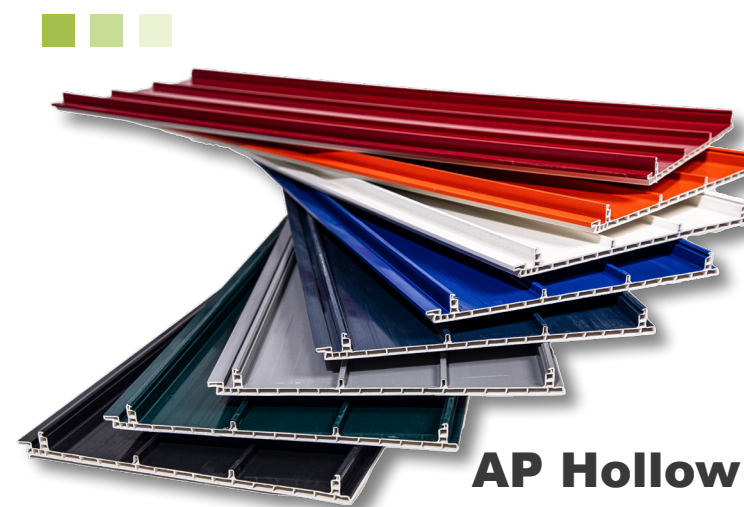

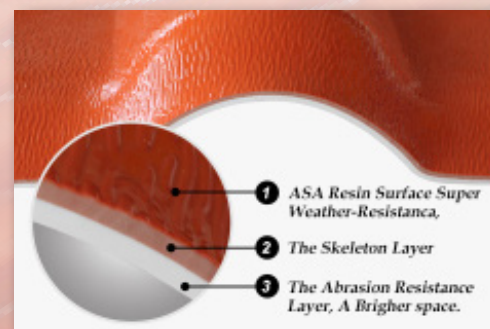

PRODUCT CENTER

We manufacture 1, 2, 3 and 4 layers ASA/RPVC/UPVC roofing & cladding sheets, and 6 main product series with a variety of accessories.

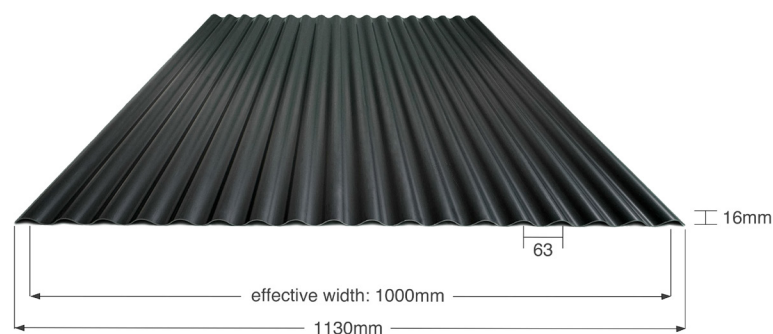

ASA Synthetic Resin Roof Tile

- Model: JBE 1050-001
- Material: ASA high weather resistant engineering plastic, UPVC material and additives
- Fireproof: B1
- Thickness: 2.0mm, 2.3mm, 2.5mm, 3.0mm, or Customized
- Length: Customized (maximum 11.8m)
- Application: Roofing
- Purlin distance: 660mm
- Color:  or Customized

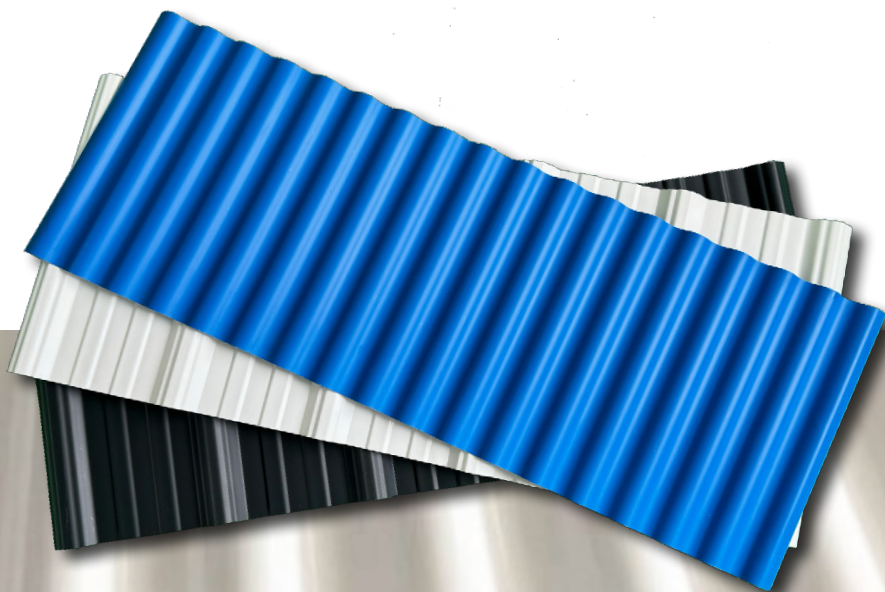

AP Hollow Panel

- Model: JBEAP01G
- Material: ASA high weather resistant engineering plastic, UPVC material and additives
- Width: 342mm(effective width:334mm)
- Fireproof: B1
- Thickness: 9mm
- Length: Customized (maximum 11.8m)
- Application: Roofing and Cladding
- Purlin distance: 600-800mm
- Color:  or Customized

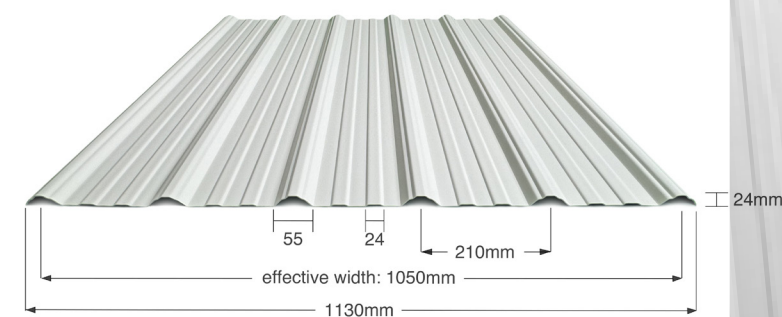

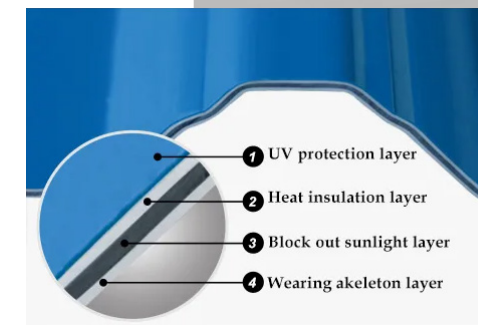

Corrugated Roof Sheet

- Model: JBE 1130-001
- Material: UPVC material,ASA layer(optional) and additives
- Fireproof: B1
- Thickness:1.5mm,1.8mm,2.0mm,2.5mm,3.0mm or Customized
- Length: Customized (maxmium 11.8m)
- Application: Roofing & Wall cladding
- Purlin distance: Maxmium 800mm
- Color:  or Customized

Trapezoidal Roof Sheet

- Model: JBE 1130-002
- Material: UPVC material,ASA layer (optional) and additives
- Fireproof: B1
- Thickness:1.5mm,1.8mm,2.0mm,2.5mm,3.0 mm or Customized
- Length: Customized (maxmium 11.8m)
- Application: Roofing & Wall cladding
- Purlin distance: Maxmium 800mm
- Color:  or Customized

PRODUCT CENTER

The Plastic sheets not only used in external buildings but also widely applied in interior decoration design. Its application scenarios are very diverse and extensive.

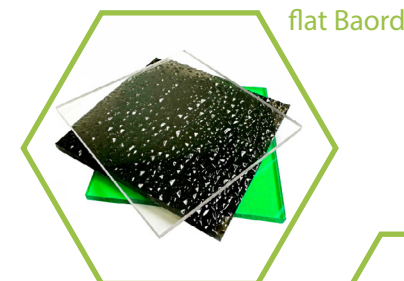

PVC Ceiling Panel

- Model: JBE 1150-001
- Material: UPVC materials
- Width: 1150mm (effective width:1080mm)
- Fireproof: B1
- Thickness: 1.2mm - 3.0mm
- Length: Customized (maximum 11.8m)
- Application: Wall & Ceiling
- Purlin distance: Maximum 800mm
- Color:      or Customized

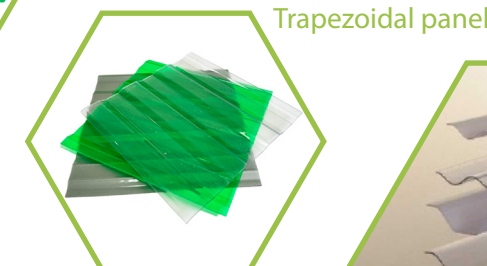

Polycarbonate Roof Panel

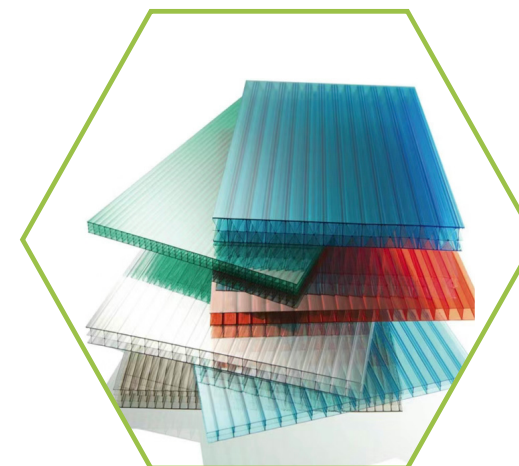

- Model: JBE 660-PC01 etc.
- Material: Polycarbonate
- Width: 660/840/930(mm)
- Style: Corrugated/Trapezoidal/Plane
- Thickness: 0.8mm - 8.0mm
- Length: Customized (maximum 11.8m)
- Application: Roof & Cladding
- Purlin distance: Maximum 1000mm
- Visible Light Transmission: 0%-92%
- Colour: Clear/Bronze Tint/Grey Tint/Opal/Customized
