

GET RID OF THE TROUBLE OF GYNECOLOGICAL PROBLEMS, JUST POST ZIMEISHU

30 years of quality assurance, 60 million people witnessed together:

▲The abortion infection is recovered

Miss Qiu (kinder garden teacher): When my male friend came to see me last time, I was pregnancy. After I went to the hospital for abortion, I didn't pay much attention to protection. My lower body was infected, and I was often bleeding. The smell was very strong. When it was strangely itchy, I had menstrual disorders. At that time, I was very scared. I took some anti-inflammatory drugs, but these drugs hurt my stomach very much. My stomach was not very good. After taking the medicine, I inhaled and vomited, and I couldn't eat. Later, I changed to the test. When I was playing with my children, it often flowed out, which made me very embarrassed. The disease has not been cured, and there is a lot of trouble. Later, the female workers of the school trade union held a reproductive lecture. I consulted a gynecologist, and the expert recommended the use of Zimeishu to protect menstruation, which was really good. I applied it for a few seconds, and immediately felt a cool air from the bottom up, which was much smoother; after a while, the vulva did not explode; the inflammation disappeared twenty days later. My period has been normal until now. Zimeishu is affordable, only equivalent to the price of ordinary cushions, and it is very convenient to use. I have been using Zimeishu for daily care, and it feels great.

▲After giving birth to a child, the vaginal elasticity recovered

Ms. Hui (civil servant): After giving birth to a child, my vaginal muscles were relaxed, and I didn't dare to carry heavy objects, laugh, or do strenuous exercise. Because if you try hard, your lower body will drip urine, making your pants wet, and it's hard to make trouble. It's really embarrassing. I wash it several times a day, but the more I wash it, the worse it gets. The washing fluid rinsing destroys the vaginal acid-base dry balance, and I have gynecological inflammation. My lower body is itchy and swollen. I can't sleep well at night, my face is yellow, my spirit is haggard, and I feel very annoyed. My friend introduced the use of Zimeishu. Zimeishu is naturally non-toxic and has no side effects, reliable quality, affordable price and convenient to use. I had a feeling when I applied it. After using it for a period of time, the gynecological inflammation disappeared, and the vaginal muscle elasticity recovered. I could exercise as much as I wanted. My husband pestered me every day.

▲A carefully selected essential gynecological supplies

Dr. Bai (Director of Gynecology): I have been working on the front line of gynecology for a long time. Now the incidence of gynecological diseases is high, and there are many patients. I'm very busy with work, so I rarely have time to take care of my health. Generally, women use more washing liquid, but the concentration of washing liquid is not easy to control, and the hygiene conditions of water and dense tools are very high, which will be infected with gynecological diseases. Taking advantage of the convenience of work, I have been looking for a convenient, safe and effective nursing product, but unfortunately I haven't found it for a long time. Once, I occasionally saw an advertisement on TV, saying that there was a kind of gynecological pad called Zimeishu. I found the relevant information of Zimeishu and found that it was indeed a good thing. Zimeishu is high in technology, and there is no harm to the human body. It is quick to sterilize and easy to hold and use. You only need to apply one piece to do it, which saves a lot of trouble. Since the appearance of Zimeishu, I have been using it, and I finally found the nursing care I needed.

▲The gynecological disease has not recurred

Ms. Dou (company employee): I have been married for more than ten years. When I was young, I didn't pay much attention to some gynecological inflammation. I took some medicine casually, such as washing thorns, plugs and so on. Unexpectedly, it got worse and worse as it was cured. The lower body was damaged, the ulcer surface was getting bigger and bigger, and antibodies were produced in the body. The effect of any medicine was not obvious. The recurrence of gynecological disease is very painful. I post Zimeishu for the treatment. After a few courses of treatment, the frequent gynecological disease was cured. I persisted in using it for a period of time, and the gynecological disease did not recur. Now I eat well, sleep well, have a good face, and feel comfortable. With Zimeishu, I no longer need to have a heart disease.

Zimeishu Gynecological Pad, an epoch-making gynecological care expert

Lightly stick, you can enjoy the new experience of care and treatment brought by Zimeishu

INVENTION PATENT NUMBER: ZL2018 11045005.0

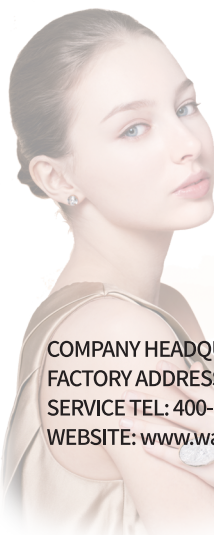

PATENT NAME: A TRADITIONAL CHINESE MEDICINE FOR THE PREVENTION AND TREATMENT OF GYNECOLOGICAL DISEASES AND ITS PREPARATION METHODS AND APPLICATIONS

Easy to use, feeling better

Thoughts hidden inside
Clear leucorrhea, no odor
The cervix is smooth and flat
The uterus has good blood circulation

Vaginal firmness and moisturizing
No itching, pain and burning sensation
The regularity of menstruation is dark red
No various kinds of inflammation problems

• Four characteristics of Zimeishu products

• Zimeishu's "Modern Gynecology Three Barriers Protection" system comprehensively protects women's reproductive health

Pathological barrier protection

Clean up inflammatory substances, inhibit deep infection of the vaginal mucosa; have a good protective effect on healthy tissues and cells; quickly repair the damage of inflammatory trauma and drugs to healthy cells, and protect healthy vaginal tissues.

Physiological barrier protection

Inhibit the respiration of bacteria and viruses, divide the bacterial cell membrane; combine with the DNA bonds of bacterial cells and viruses, so as to effectively play a bactericidal and antiviral role, and play a good shielding protective role; The antibacterial effect is long-lasting, maintaining the balance of normal flora and PH value in the vagina, improving the physiological self-cleaning and detoxification ability of the vagina, directly and effectively blocking pathogens, cutting off the source of infection, improving the physiological function and ability of vaginal mucosal cells to resist pathogens, and protecting the vagina from pathogen invasion and infection.

Nursing barrier protection

Improve the physiological function of cells and the ability to resist pathogens. It has the effect of nourishing yin and regulating endocrine; and it can nourish yin, delay the decline of reproductive organs, and improve the disease resistance of reproductive organs; it also has the effect of moistening yin and refreshing care.

Use it for five seconds, refreshing and comfortable;
Use it for three minutes, eliminate vulvar itching;
Use it for more than two days, the smell will be eliminated and the swelling will subside;
Use it for more than 20 days, dysmenorrhea disappears, the leucorrhea is normal, and the infection is cured;
Use it for more than 30 days, completely get rid of gynecological troubles and prevent recurrence.

The clinical practice of Zimeishu Gynecological Pad proves:

• Gynecological problems are difficult to solve

The traditional nursing "three-character scripture" is really "damage"

▲ One says "washing" —damages the vaginal environment

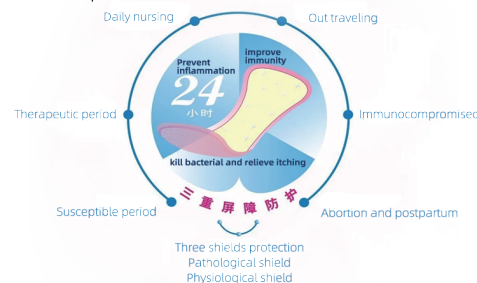

"Wash" - the effect is fast and easy to use, but the washing liquid contains a large number of medicinal ingredients, and the concentration of products produced by different manufacturers varies. If used frequently, it will destroy the normal acid-base balance in the vagina; long-term use has great side effects, which can destroy and inhibit the body's own immune function and endanger human health.

▲ Two says "Fill in" - damage the vaginal mucosa

"Fill in" - strong effect, but foreign objects often go in and out of the vagina, which will inevitably scratch the fragile mucosal tissue in the vagina, causing trauma. The concentration of suppository and gel drugs is high, which are completely dissolved by vaginal secretions. A large amount of high-concentration solutions will seriously burn the vaginal mucosa, enlarge and deepen the wound, and damage the female organs.

▲ Three says "take" - harming human immunity

"Take" - It is simple and convenient to take drugs, but drugs often contain a large amount of antibiotics. Long-term use of antibiotics will cause flora mutation and produce super drug-resistant bacteria, which greatly reduces the effect of oral drugs, or even ineffective. Although the human body's immunity to germs is also reduced, there is nothing we can do in the face of the virus, resulting in poor treatment of gynecological diseases and repeated attacks.

• Get rid of the trouble of gynecological problems, experts give a "true word"

Using traditional methods to treat gynecological diseases is too harmful. In the process of killing germs, drugs also cause damage to the human body or lead to a decrease in immunity. Experts pointed out that the treatment process of gynecological diseases shows a vicious circle of "treatment - injury or toxic side effects - recurrence - increased treatment - greater damage and toxic side effects", resulting in a high incidence and frequent occurrence of gynecological diseases, which are easy to repeat and cannot be cured for a long time. The originally mild gynecological inflammation has been cured into an intractable gynecological disease, which destroys women's physical health, affects family happiness, and even takes away precious lives!

In view of the shortcomings of traditional prevention and treatment of gynecological diseases, scientific researchers have developed a new generation of gynecological health care and treatment products - Zimeishu gynecological pads. Experts believe that in the prevention and treatment of gynecological problems, Zimeishu can effectively solve gynecological problems by adopting the "post" method, which is a breakthrough research result in the field of female reproductive health. Stick" on Zimeishu, which can effectively use the rich silver ions in Zimeishu to kill gynecological bacteria. Silver ion is a natural bactericide, which is fast and long-lasting, without any toxic side effects. Experts emphasized that the adoption of the "post" method has changed the traditional concept and means of preventing and treating gynecological diseases. Its biggest advantage is that it does not cause any damage to the organs and does not have any toxic side effects. Natural bactericidal ingredients silver ion and traditional Chinese medicine extract essence improve human immunity, activate the self-cleaning function of the female reproductive system, and prevent the recurrence of gynecological diseases, thus effectively ensuring women's reproductive health.

• Zimeishu's three major scientific and technological innovations set off a new revolution in gynecological care

New revolution of dosage form - natural silver ion sterilization, no damage and no side effects

- ◆ A small amount of silver ions can kill a large number of bacteria. Silver ions can combine with negatively charged pathogenic bacteria, thus entering the bacteria to destroy their DNA, causing the death of the pathogen, and then continue to free to attack the second pathogen;
- ◆ The silver ion sterilization process has no half-hearted period, the pathogen will not produce drug resistance, and the sterilization is more thorough and safer to use;
- ◆ Silver ions can remove inflammatory substances, eliminate drug toxicity, and repair vaginal mucosal damage caused by drugs and inflammation;
- ◆ Silver ions can promote the metabolism of cell tissue, restore mucosal tissue and enhance its physiological function.

The new revolution of therapy - "post" can get rid of the trouble of gynecological diseases

- ◆ The shape of "Zimeishu" is designed, developed and produced according to the principle of ergonomics, according to the unique physiological structure and pathogenesis of women, which is similar to the cushion.
- ◆ Zimeishu uses high-tech extraction technology to extract the essence of traditional Chinese medicine to the greatest extent and attach it to the hollow cotton. When used, under the action of human body temperature, the extracted essence of traditional Chinese medicine in the medicine pad begins to be released in a molecular state and absorbed into the vagina, which can play an effective treatment, prevention and nursing effect in normal physiological and pathological conditions.
- ◆ "Zimeishu" is close to the female vulva and is given to the reproductive system through the principle of percutaneous absorption. The female vulva has an extremely rich microvascular and neural network system, which can absorb a large amount of plant essence and keep it for a long time.
- ◆ The vagina, uterus, fallopian tubes, ovaries, etc. have double sets of blood vessels to supply nutrition and metabolism. "Zimeishu" has a conditioning effect on the internal reproductive system through drugs, maintaining the physiological balance of the flashback, and enhancing the disease resistance of the genitals and the body's immune function.

The new revolution of ideas - changing women's traditional nursing habits

- ◆ Zimeishu's theory is based on the pathogenesis, treatment principle and epidemiological research of gynecological diseases, combined with Zimeishu's unique dosage effect, and has been clinically verified by tens of thousands of gynecological patients for more than ten years. "Three barrier protection" is a new concept of modern gynecological treatment, which completely subverts the situation that the disease is prone to recurrence, excessive drug use, and excessive toxic side effects in traditional gynecological treatment. It has won the recognition of many senior experts. It has won praise in many academic seminars on domestic gynecological reproductive infection, and is known as "modern gynecological clinical medicine The perfect combination with preventive medicine is of epoch-making significance in the field of modern gynecology research in China.
- ◆ Compared with traditional nursing methods, Zimeishu is efficient and convenient, which is most suitable for women's work and living habits. You only need one tablet a day, which is healthy and refreshing without burden. From now on, you will no longer worry about cleaning and secret medicine. With a gentle stick, it fits in a considerate fit. Whether it is work, business trip, or exercise, it will not be affected in any way, and stay away from gynecological diseases in a relaxed and comfortable way.

Zimeishu Gynecological Pad After strict clinical testing by authoritative institutions such as Xi'an Medical University:

Vaginitis the efficiency is as high as 99%
Pelvic inflammation the efficiency is as high as 97%
Adnexitis the efficiency is as high as 95%
Cervical erosion the efficiency is as high as 98%
Uterine fibroids the efficiency is as high as 63%
Ovarian cyst the efficiency is as high as 92%
Uterine polyps the efficiency is as high as 95%
Irregular menstruation the efficiency is as high as 99%
