● About Colku

Colku Electrical Appliance Ltd. was founded in 1989. With the 50000m³ workshop and 4 automatic assembly lines, we have the production capacity of 2000 units per day. During the past 25 years, Colku has become a top OEM/ODM manufacturer of truck air conditioner and portable refrigerator. We offer the service from product design, structure build up, molding producing, first sample making, certificates applying to final production. Our factory covers processes including plastic injection, plastic absorber forming, metal lazer cutting, punching, bending, logo printing, foaming injection, compressor producing and final assembling. Colku pays high attention to Quality Control System, and implemented the ISO 9001 and IATF 16949 Systems. With our MES controlling system, we have strict control on each step from incoming materials, semi-products processing, foaming, assembling, electrical testing, leakage detecting, final checking, sampling and ex warehouse.

● Figures

36 years of manufacturing experience
25 years experience of manufacturing & innovation in mobile refrigeration industry
4 factory sites,50000 square meters production workshop
4 automatic assembly lines, 300+ employees with 60000 sets monthly output
22 cooperation international leading brands
Products export to 56 countries
1 Million units export volume

● Patents and Certificates

IATF16949, ISO9001, ISO14001, ISO45001&ISO10012 Management Systems
Products complies UL ETL SAA GS CE CB Certificates and 100+ Patents

DC Rooftop Air Conditioner

HT22

- * COP 3.0
- * Twin-rotor compressor, fast cooling

HT23

- * COP 3.1
- * Powered twin rotary compressor, high efficiency

Product Parameters	HT22	HT23
Cooling Capacity	2200W	2300W
COP	3.0	3.1
Input Voltage	DC 24V	DC 24V
Refrigerant	R410a/330g	R410a/450g
Working Temperature	16~55°C	16~55°C
Current	8-37A (35°C ambient temp)	8-37A (35°C ambient temp)
Evaporator Air Volume	380m³/h	400m³/h
Setting Temperature	15~30°C	15~30°C
Weight	31kg/net,39kg/gross	30kg/net,38kg/gross
Product Size		
Air Distributor Size	350mm*345mm*140mm	350mm*345mm*140mm
Outer Body Size	976mm*894mm*210mm	928mm*872mm*188mm
Package Size	1040mm*965mm*455mm	1010mm*960mm*380mm
Loading QTY	59sets/20GP 120sets/40GP 130sets/40HQ	72sets/20GP 144sets/40GP 144sets/40HQ

- * COP 3.25
- * Brushless DC Fan,
Low noise & stability

- * COP 3.0, GMCC rotary compressor
- * Upgrade 3 air outlet

- * COP 3.25
- * Fast cooling, high efficiency

Product Parameters	HT28	RS33
Cooling Capacity	2600W	2700W
COP	3.25	3.0
Input Voltage	DC 24V	DC 24V
Refrigerant	R410a/430g	R410a/460g
Working Temperature	16~55℃	16~55℃
Current	8~40A (35℃ ambient temp)	8~38A (35℃ ambient temp)
Evaporator Air Volume	400m³/h	450m³/h
Setting Temperature	15~30℃	15~30℃
Weight	31kg/net,39kg/gross	34kg/net,42kg/gross

For Medium Truck

DC Rooftop Air Conditioner

MT20 | MT20A

DC Rooftop Air Conditioner

MT20

Energy saving,
special for 24V medium truck

- * COP 3.1
- * Energy saving, waterproof

MT20A

Compact design,
special for 12V medium truck

- * COP 2.8
- * Compact design, hidden mounting

Product Parameters	MT20	MT20A
Cooling Capacity	1950W	1650W
COP	3.1	2.8
Input Voltage	DC 24V	DC 12V
Refrigerant	R410a/345g	R410a/345g
Working Temperature	16~55℃	16~55℃
Current	8~32A (35℃ ambient temp)	15~50A (35℃ ambient temp)

How to Install DC Rooftop Air Conditioner

NOTE

The installation accessories may vary slightly among different truck models. Below are the installation steps using universal installation accessories.

Step01: Remove the sunroof from the truck's roof (if there is no sunroof to remove and cutting is required, the recommended cut-out size is: 380mm front-to-back and 480mm side-to-side)

Step02: Clean the area around the sunroof and apply waterproof adhesive tape (if the roof surface is uneven, ensure the waterproof tape is tightly adhered without gaps)

Step03: Apply glass sealant on top of, around, and at the joints of both ends of the waterproof tape.

Step04: Install the core pull nuts on the black base plate of the air conditioner. This step can be done before steps 1, 2, and 3 (if the sunroof size is around 380*480mm, use the universal decorative cover, and the nuts should be installed in holes No. 6 and No. 7. The specific holes to use depend on the actual sunroof size).

Step05: Center the air conditioner on top of the tape.

Step06: Use black iron rods and screws to securely fix the decorative cover.

Step07: Use magic tape and straps to secure the power cord along the back of the truck and route it to the battery location.

Step08: Connect the positive and negative terminals of the power cord to the corresponding positive and negative terminals of the battery.

Step09: Turn on the air conditioner for testing and let it run for 10 minutes. Operate the remote control to observe if the mode and fan speed change normally.

How to Install Split-type DC Air Conditioner

Step01: Select a suitable installation location for the outer unit, mark and drill holes

Step02: Install rivets in the fixing holes of the bracket

Step03: Remove the upper cover of the outer unit, place it in the designated location, and use the matching screws to fix it

Step04: Choose a suitable location for mounting plate, then hang the air distributor on it, and drill the screws into the corresponding holes

Step05: Select a drilling location according to the installation location and pipe routing direction of the air conditioner, then use straps to wrap the internal and outer units links

Step06: Choose a suitable location to separate the drain pipe separately, continue to bandage it. And then use connecting pipes to connect internal and outer units

Step07: Extend the power cord out of the hole and wrap the exposed part of the pipe with a sponge

Step08: Connect the power cord to the outer unit and secure it with a tie, and vacuum for 30 minutes

Step09: Turn on the air conditioner to test the operating effect. If there is no problem, reinstall the upper cover of the outer unit
