PET DTF FILM

SAILLAGE DTF Film is independently developed and manufactured by SAILLAGE, using the market's **only fully water-based coating formula**. With vivid color performance, excellent batch stability, high ink loading capacity, anti-static properties, clean powder release, and eco-friendly features, SAILLAGE DTF Film offers a reliable and high-performance solution for professional DTF printing.

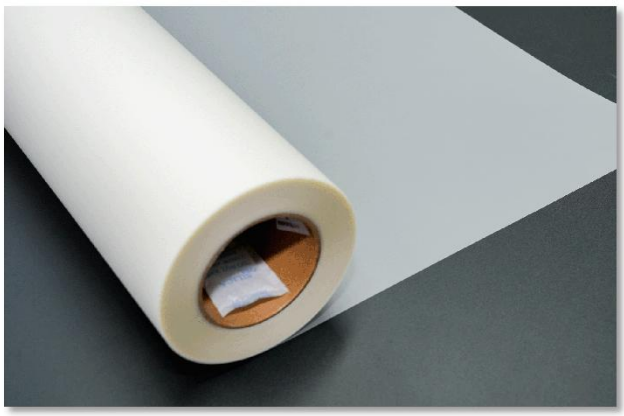

WATER-BASED DTF FILM

TD7007 75um DOUBLE SIDED MATT

HOT/COLD PEEL

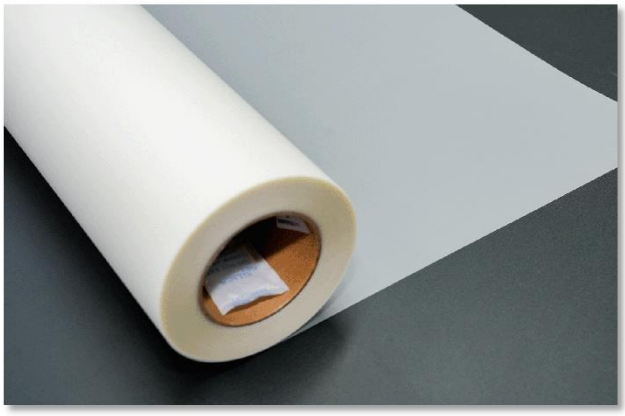

Best-selling standard DTF PET film
130% ink load/Most Vibrant Color

TD7008 75um SINGLE SIDED MATT

HOT/COLD PEEL

Single-sided of TD7007
130% ink load/Most Vibrant Color

TD8002 75um DOUBLE SIDED MATT

INSTANT PEEL

Instant Peel, Outstanding transfer precision for fine and intricate designs

TD8003 75um SINGLE SIDED MATT

INSTANT PEEL

Single-sided of TD8002
Instant Peel

TD9002 100um DOUBLE SIDED MATT

HOT /COLD PEEL

Better Feeding Stability, Heat Resistance, and Dimensional Stability

75um Sheet DOUBLE SIDED MATT

HOT/COLD PEEL

Size: A3/A4/A3+

Packing: 50/100 sheets

UV DTF A&B FILM

--Professional UV Transfer Film for Hard Surface Decoration

SAILLAGE UV DTF A & B Film is a professional transfer film solution for UV DTF printing. It includes A Film for printing and B Film for transfer, delivering vivid colors, sharp details, strong adhesion, and clean release performance. No heat press is required, making the application process simple, fast, and efficient.

Applications

① **Product labels**
② **Brand logos**
③ **Decorative stickers**
④ **Glass cup decoration**
⑤ **Acrylic signs**
⑥ **Cosmetic packaging**
⑦ **Gift boxes**
⑧ **Phone cases**
⑨ **Metal bottles**
⑩ **Ceramic products**
⑪ **Promotional gifts**

Product Structure

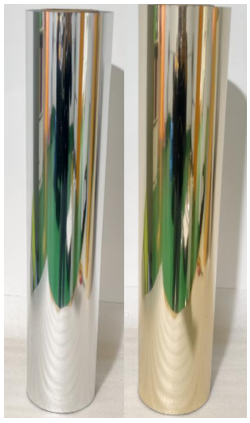

Component	Function	Typical Description
A Film	Printing carrier	PET-based release film with a printable coating layer for UV DTF printing.
B Film	Transfer adhesive film	Lamination film that helps carry the printed graphic and transfer adhesive layer to the final
Finished Transfer	Decorative graphic	Printed and laminated UV DTF graphic ready for peel-and-stick transfer.

UV TPU FILM FOR 3D LOGO

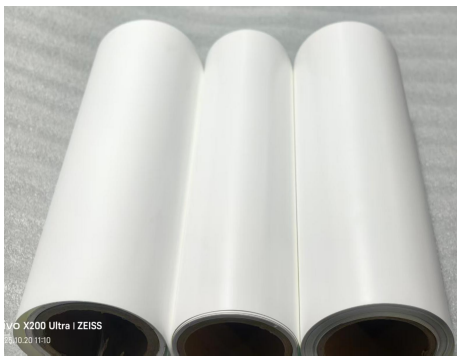

PU/TPU Printable Film for UV Printing is a flexible heat-transfer film for creating high-definition 3D logos and graphics on fabrics and apparel. With excellent elasticity, softness, UV ink adhesion, and vivid color performance, it delivers durable raised effects without cracking or peeling, making it ideal for premium garment decoration and custom branding.

KEY SPECIFICATION :

Thickness: 0.35mm (0.6*25m/50m)

White	Gold/Silver	Transparent	Laser Silver	Shiny gold/silver
				

Thickness: 0.5mm (0.6*25m/50m)

TPU WHITE	Gold Glitter	Silver Glitter	PU WHITE
			

TPU HOT MELT POWDER

SAILLAGE polyester ammonia hot melt adhesive powder, is made of 100% pure TPU, features high bonding strength and excellent elasticity, making it widely used in the heat transfer industry. It is commonly applied in various textile heat transfer processes such as DTF printing, foil stamping, heat transfer graphics, rhinestone fixing, and badge or woven label applications.

Item	Specification
Material	100% TPU
Particle Size	0-80 micron 80-170 microns 170-250 microns
Color Options	White / Black
Melting Range	110 – 130℃
Pressing Temperati	140 – 160℃
Pressing Time	6-8 seconds
Packaging	500g/1kg / 5kg / 20kg / customized
Product Options	**Recommended Use**
Fine Powder	Detailed designs, small letters, delicate graphics
Medium Powder	General DTF printing, T-shirts, hoodies, bags
Coarse Powder	Thicker fabrics, stronger bonding requirements
White Powder	General use, light and dark fabrics
Black Powder	Dark fabrics, anti-migration applications

HIGH END SERIES

Use imported resin. Ink system is stable, highly concentrattion, and color super vivid.

MIDDLE END SERIES

Ink system is stable, concentration close to high-end , consistent quality.

ECONOMIC SERIES

Concentration is lower than high & middle-end, quality stable

DTF PIGMENT INK

Ink system is stable, with high concentration and vivid colors. White ink offers excellent whiteness, strong coverage, and great compatibility with CMYK. Perfectly matched with our transfer film—no ink bleeding or smudging during printing. Finished prints are oil-free, highly stretchable with strong rebound, durable, soft to the touch, and skin-friendly.
