Manual

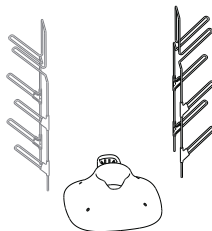

Install

1. The extension handle is detachable. When you don't use the extension handle, plug in the handle hook. You can change it easily, according to your needs.

Note: press the button when pulling out the extension handle.

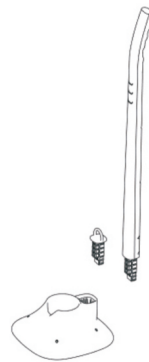

2. Put the triangular shaft in the hole of the brush and rotate clockwise to install; rotate the brush in the opposite direction and give an outward force to push it down.

3. The storage base comes with a stainless steel rack to store the brushes.

4. You can either put the handle hook or the extension handle directly into the storage base.

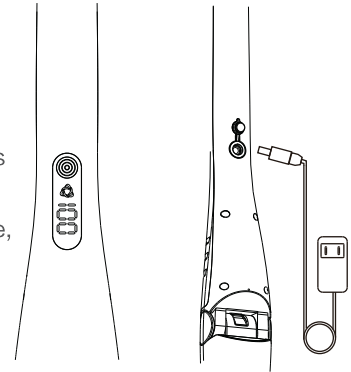

5. Put the brushes into the rack to let them dry.

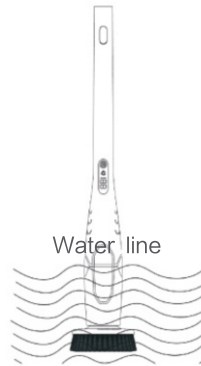

Instructions

1. Power on/off button - switch speed
2. Press the power button to turn it on, the speed indicator light will turn green. Low speed is at 180rpm.
3. Press the power button twice, the speed indicator turns red. High speed is at 240rpm.
4. Press the power button three times to turn it off, when in low speed mode, press it for more than 3 seconds to turn it off.
5. A battery indicator shows 100 when battery is full. It will turn off automatically when power is too low. The charging port is on the back.

Waterproof

The part above the rotation shaft was designed to be submerged in water, the part below rotation shaft can only work under water for a short time.

Velcro connector

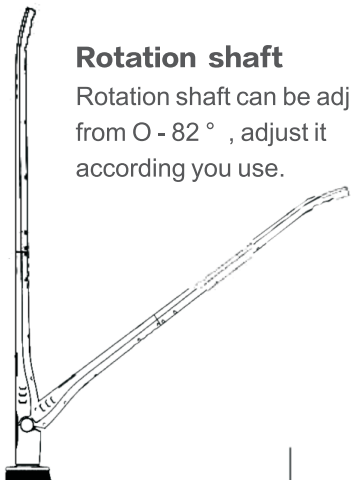

Velcro brush has 4 velcro strips to stick the sponge brush or chenille brush.

Instructions

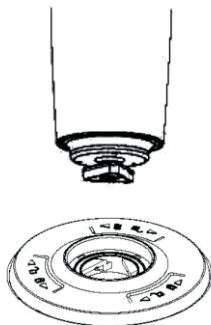

Rotation shaft

Rotation shaft can be adjusted from 0 - 82° , adjust it according you use.

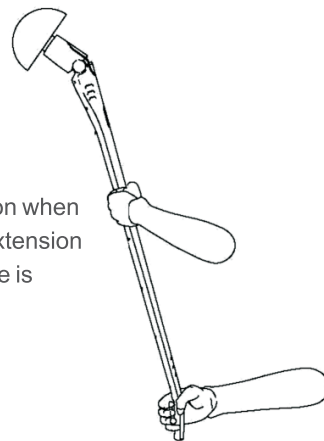

Change brushes

Put the triangular shaft in the hole of the brush and rotate clockwise to install; rotate the brush in the opposite direction and give an outward force to press it down.

Extension handle

Please press the stuck button when you plug in or pull out the extension handle, the extension handle is made of ABS material.

Basic parameters

CX-QXJ100	Parameters
Battery capacity	2000 mAh
Voltage	DC 7.4V
Power	84W
Adapter output voltage	DC 9V 2A
Charging time	2.5-3h
